CHAPTER – I

INTRODUCTION

The State of Telangana is home to large manufacturing industries in Pharmaceuticals, Agro-processing, Cement & Mineral-based industries, high precision engineering, textiles, Iron & steel, Electrical Equipment's, Defense etc. The State is one among the major industrial states in the Country ranked 6th in terms of industries and ranked 9th in terms of Gross Value Added from industries. The Telangana Government is promoting industrial incentive policy to create quality infrastructure coupled with congenial industrial environment to make Telangana an attractive investment destination for both foreign and domestic investors

Growth of Industrial Sector

The Industrial Sector is contributing around 25% to 30% to the Gross State Domestic Product with a direction of positive growth in the state. The long-term average annual growth of industries comprising mining & quarrying, manufacturing, electricity, gas and water supply and construction, during the period between 2005-06 and 2014-15, averaged at 7.8% as against GSDP growth of 9.4% in the state. The contribution of industry sector is showing almost the same trend in respect of share and growth as that of all India

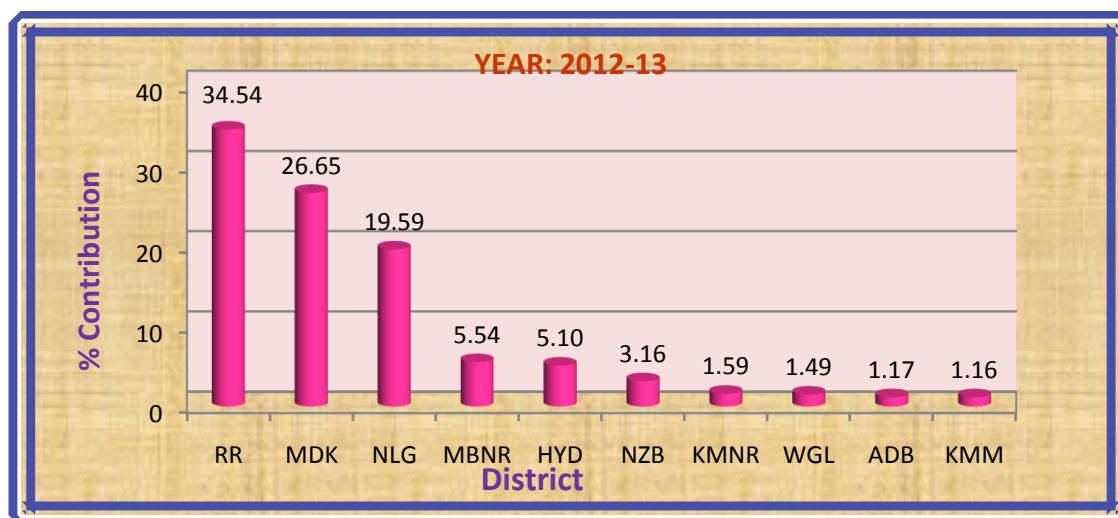

The share of industry sub sector in the Gross State Domestic Product (GSDP) is presented below.

Share of Industry & Subsectors (%) in GSDP at Current Prices			
Sl.no	Sub-Sector	2004-05	2012-13(SRE)
1	Mining & Quarrying	4.8	3.9
2	Manufacturing		
	a. Registered	10.0	10.5
	b. Un Registered	3.2	1.8
3	Electricity, Gas & Water supply	2.8	1.8
4	Construction	7.5	8.7
5	Industrial Sector contribution to GSDP	28.3	26.7

Key Industries in Telangana :

Knowledge based industries such as Information Technology enabled services (ITES), pharma, Cement and engineering components have a strong presence in Telangana. They are highly concentrated in Rangareddy, Medak and Nalgonda. These Districts together accounting about 80% of the GVA from organized manufacturing sector. which have strong infrastructure, availability of skilled manpower and research institutions.

The district wise contribution of organized manufacturing sector is as follows.

Annual Survey of Industries The Annual Survey of Industries is the principal source of organized manufacturing statistics in India and in the state as well. It provides statistical information on industries to assess and evaluate the changes in the growth, composition and structure of organized manufacturing sector, comprising activities related to manufacturing processes, repair services, gas and water supply and cold storage.

The survey is conducted annually on a sample basis under the statutory provisions of the Collection of Statistics Act, 2008 and Rules, 2011. The Annual Survey of Industries covers all factories registered under sections 2m(i) and 2m(ii) of the Factory Act, 1948. The survey also covers Bidi and Cigar manufacturing establishments registered under Bidi and Cigar Workers (Condition of Employment) Act, 1966 and employing 10 or more workers using power and 20 or more workers not using power.

Conduct of Survey The National Sample Survey Office (NSSO), (FOD) is the Statistical authority appointed under this act for the purpose of Collection of these statistics. From the year 2006-07, the State Govt. has started collection of ASI data in the Residual Samples, which were selected by CSO, Kolkata. In 2012-13, the sample designed has been changed and sample units are selected after excluding the census units.

Hence the present report on ASI for the year 2012-13 is based on the data obtained from **Pooling** the data collected by both the state Govt. and Central Statistical Office (Industrial Statistics Wing), Government of India. The report presents a comparative study of the estimates of the principal characteristics and its percentage distribution at the state/district levels.

Objective of the Survey: It had been designed to obtain comprehensive and detailed data on the following objectives

- i. Estimating the contribution of registered manufacturing industries as a whole to the State income,
- ii. Systematic study of the structure of the industry .
- iii. Analysis of various factors influencing industries in the State to facilitate the construction of comprehensive, factual and systematic bases for formulation of policy.

1.1 ASI Schedule: It is the basic tool to collect required data from the factories registered under Sections 2m (i) and 2m (ii) of the Factories Act,1948. The schedule has two parts.

Part-I : Collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items (indigenous and imported) products and by-products, distributive expenses, etc.

Part-II : Collect data on different aspects of labour statistics viz.,working days, man-days worked absenteeism, labour turnover, man-hours worked etc.

1.2 Coverage of units: It covers all factories registered under

- Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948, where the manufacturing process is defined under Section 2(k) of the said Act.
- The survey also covers Bidi & Cigar manufacturing establishments registered under the Bidi and Cigar Workers (Conditions of Employment) Act 1966.
- All Captive electricity plants registered with the Central Electricity Authority (CEA).

1.3 Uncovered Units

- a) All Government Departments
- b) Defense establishments
- c) Oil storage and distribution Depot
- d) The departmental units such as railway workshops, RTC workshops, Govt. Mints, sanitary and water supply, gas storage
- e) Technical training institutions not producing anything for sale or exchange.

1.4 Reference Period: The reference period (year) is the financial year 2012-13 (April-March) for all items.

1.5 Classification of Industries: All the factories in the ASI frame has been classified into the appropriate industry group on the basis of the principal product manufactured. The estimates for different aggregates presented to the corresponding to the National Industrial Classification (NIC)-2008 codes.

1.6 ASI Frame: The ASI frame is based on the list of registered factory/units maintained by the Director, Directorate of Factories in the state and those maintained by registration authorities in respect of bidi and cigar establishments and electricity undertakings.

The frame is being revised and updated periodically by the regional offices of the Field Operations Division of National Sample Survey Organization (NSSO). At the time of revision, the names of the de-registered factories are removed from the ASI frame and those of the newly registered factories are added.

During updating only new registrations are added to the existing frame. In spite of regular updating of the frame, quite a number of small-sized factories selected for the survey are found to be non-existing in the field and are termed as deleted factories.

1.7 Sampling Design: The sampling design adopted in ASI has undergone considerable changes from time to time, taking into account the technical and other requirements. The revised sampling design has been adopted from ASI 2012-13. According, the new sampling design comprises two parts Central Sample and State Sample.

The Central Sample further divided into two sectors namely Census and Sample Sectors.

(a) Census Sector:

- (i) Units having 100 or more employees,
- (ii) All factories covered under joint returns.
- (iii) After excluding the Census sector units, all units belonging to the strata(District x Sector x 4 digit NIC-2008) having less than or equal to 4 units are also considered under Census Scheme. While formation of stratum, the sectors are considered as

- I) Bidi & Cigar units
- II) Manufacturing
- III) Electricity.

(b) **Sample Sector:** Remaining units, excluding those of Census Sector called the sample sector are arranged in order of their number of employees and samples are drawn circular systematically considering sampling fraction, say 20% within each stratum(District x Sector x 4-digit NIC-2008.) in the form of 4 independent sub samples. This will be done for each district and thus, for each State.

- An even number of units with a minimum of 4 are selected from each stratum and evenly distributed in four sub samples. (See Annexure – X for detailed description of NIC Codes referred in this publication).

(c) **Allocation of Samples:** All the units belonging to the Census Sector together with selected units of 2 sub-samples, say, of sub-sample 1 and 3 will form the central sample and information of these units will be collected and processed by the Central Agency (i.e NSSO and CSO(ISW)).

After selecting the central sample in the way mentioned above, the units selected for remaining 2 sub-samples, say, of sub-samples 2 and 4 will be allocated for each DES.

Validated state-wise unit-level data of the central sample will also be sent to the states for pooling this data with their surveyed data to get a combined estimate at the district level with a gap of two years.

As per the above procedure, total number of factories in Telangana State is 13608. Out of which 1521 units are selected under Census Sector and out of the remaining 12087 units, 2066 samples were allotted in between the Center and State are as follows

- No. of Samples allotted to the NSSO (FOD): 1033
- No. of Samples allotted to the State: 1033

1.8 LIMITATIONS: The fieldwork of Annual Survey of Industries is conducted by National Sample Survey Organisation, Field Operations Division (NSSO, FOD). The unit level data entry, validation etc. are done by Central Statistical Organisation (CSO) and State wise final results are published by CSO, Kolkata. The analysis given in this

report is based on pooled data of both state and central units. It may be noted that these results are not comparable over years because

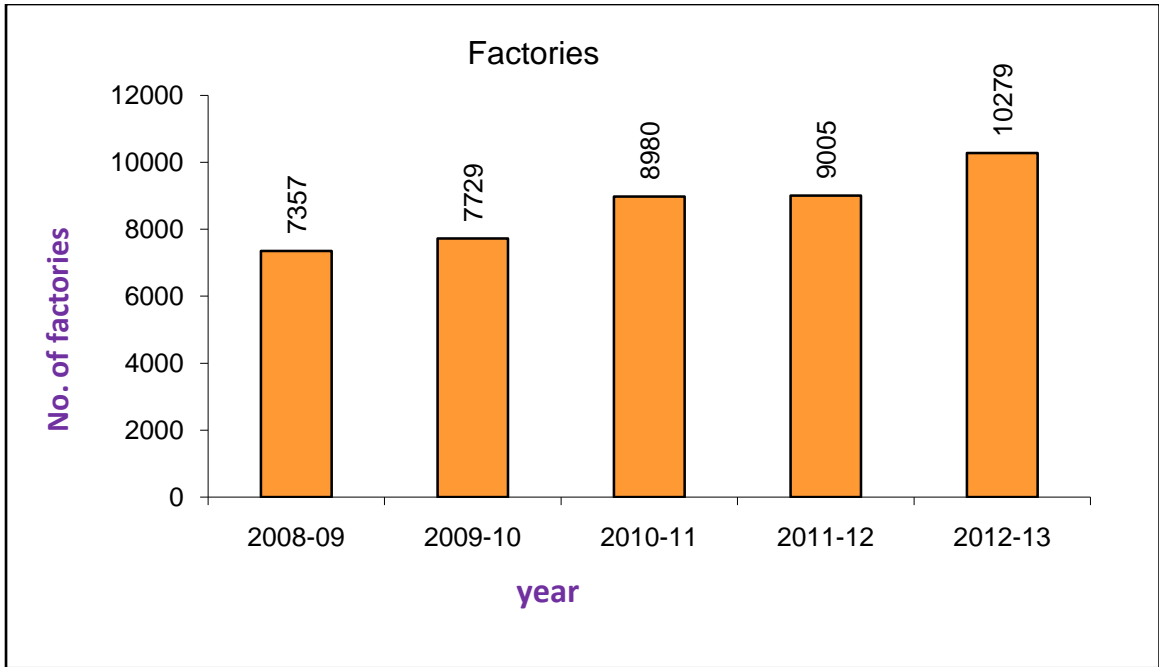

- 1) Due to changes in prices of commodities from year to year, some of these ratios particularly value based characteristics are not strictly comparable over time. In addition to the non-adjustment for non-responding units in each year may in certain cases render these comparisons not feasible over time.
- 2) The Collection of Statistics Act prohibits the disclosure of the data relating to individual factory. As such, in case where the data related is less than three factories in any industry group or in any district, such data have been clubbed in miscellaneous industry group.
- 3) In the course of tabulation of data the figures were rounded off to the nearest integer at various levels of aggregation. Consequently, there can be a slight variation in the totals represented at higher levels of aggregates and the sum of corresponding constitutes published in the tables.
- 4) In certain cases, there may be abnormal growth / decline in some characteristics compared to the previous years. i.e.
 - a) Inclusion of new units in the frame, particularly in the Census sector.
 - b) Selection/non selection of some Sample units, having considerable value of multiplier.
 - c) Movement of Sample units in the previous year to Census units in the current year, depending either on the size of employment or due to the sampling strategy or both, and vice-versa.
 - d) Limitation in respect of results of Telangana state if any

1.9 Processing and Tabulation of Data: All filled-in schedules of all States are transcription, scrutiny and processing was done at the CSO (IS Wing), Kolkata. The processing of State ASI data is taken up by the DES, pooling of both state and Central was being done at the State level for estimating important industrial characteristics at disaggregated levels i.e. to get a combined estimate at the sub-state level.

1.10 Presentation of Data : The pooled estimated results presented in this report are related to reported factories of both Census and sample sector .

The tables describe several important Industrial characteristics such as changes in Fixed Capital, Working Capital, Invested Capital, Number of Employees, Workers and Emoluments paid to them, Value of output, Value of input and Net Value Added etc. Besides, a comparative analysis has been done in the report to show the trend of Industrial growth in the State and at District level.

The value figures are generally rounded off to Rupees lakh, hence the total of all industry figures may not tally with the sum of individual industry figures.

CHAPTER – II

HIGHLIGHTS: The following are the notable points with reference to Telangana State in the results of ASI 2011-12 and 2012-13:

- a) The number of factories increased to 10,279 in 2012-13 from 9005 during 2011-12
- b) Total no. of employees engaged in the 10,279 factories are 7.08 Lakhs.
- c) The Telangana State is one among the major industrial states in the country and ranked 9th place in terms of gross value added (GVA) i.e Rs. 33,975 crores.

2.1 TOP INDUSTRIES

Top five industries (2-digit level of NIC) at state level having major percentage shares in the estimated value of overall aggregate are given below:

Rank	Important industrial characteristics				
	Number of factories in operation	Fixed Capital	Employment	Output	Gross Value Added(GVA)
1	Food Products (27.00%)	Other Non-Metallic Mineral Products (19.53%)	Tobacco Products (34.98%)	Pharmaceuticals (18.95%)	Pharmaceuticals (29.37%)

2.3 Top Districts : Top five districts in terms of their percentage shares in the value of overall aggregates for each of the characteristics for the year is as follows:

Rank	Important Characteristics				
	No. of factories	Fixed Capital	Employment	Output	Gross Value Added (GVA)
1	Rangareddy (36.94%)	Rangareddy (29.78%)	Nizamabad (28.79%)	Rangareddy (34.76%)	Rangareddy (34.54%)

5	Mahaboobnagar (6.80%)	Khammam (5.51%)	Nalgonda (6.47%)	Khammam (2.74%)	Hyderabad (5.10%)
Total	10279	5952098	707738	15462168	3397463

Fixed Capital: Fixed Capital represents the depreciated value of fixed assets owned by the factory as on the closing day of the accounting year.

FIXED ASSETS are those, which have normal productive life of more than one year.

Fixed Capital covers all type of assets, new or used or own constructed, deployed for production, transportation, living or recreational facilities, hospitals, schools, etc. for factory personnel.

- **It includes** land, building, plant and machinery, furniture and fixtures, transport equipment etc.
- **It also includes** the fixed assets of the head office allocable to the factory and also the full value of assets taken on hire-purchase basis (Whether fully paid or not) excluding interest element.
- **It excludes** intangible assets and assets solely used for post manufacturing activities such as, sale, storage, distribution, etc.

Depreciation: The consumption of fixed capital by the factory due to wear and tear and obsolescence during the accounting year and is taken as provided by the factory owner or if not provided by the factory this is estimated on the basis of cost of installation and working life of the fixed assets.

$$\text{Depreciation Rate} = \frac{\text{Total Value Of Asset including installation cost}}{\text{Estimate of working life in years.}}$$

Physical Working Capital:

- a) **It include**, all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the value of stock of **materials, fuels and lubricants, stores etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing.**

- b) **It also includes** purchased expressly for re-sale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. Finished goods processed by others from raw materials supplied by the factory and held by them are included.
- c) **Excluded** the stock of the materials, fuels, stores etc. supplied by others to the factory for processing and finished goods processed by the factory from raw materials supplied by others.

Working Capital: It is the sum of total of the physical working capital , cash deposits in hand and at bank and the net balance receivable over amounts payable at the end of the accounting year.

Amounts receivable includes value of credit items on revenue account, such as sums due to the factory for goods sold, amounts advanced in connection with normal factory work, bills of exchange payable to the factory, payments made in advance such as for fire insurance, telephone charges, rates and taxes, call deposits and security deposits having a normal life of less than one year, etc.

Excluded: Unused overdraft facility, fixed deposits irrespective of duration, advances for acquisition of fixed assets, long-term loans including interest thereon and investments.

Invested Capital: Total of fixed capital and physical working capital

Productive Capital: Total of fixed capital and working capital.

Gross Output: Gross Output is defined to include the ex-factory value, (i.e., exclusive of taxes, duties, etc. on sale and inclusive of subsidies etc., if any) of products and by-products manufactured during the accounting year, and the net value of the semi-finished goods, work-in-progress (represents the excess / deficit of value of semi-finished goods or work-in-progress at the end of the accounting year over that of the beginning of the year plus net balance of semi-finished fixed assets on factory's capital account) and also the receipts for industrial and non-industrial services rendered to others, value of semi-finished goods of last year sold in the current year and sale value of goods sold in the same condition as purchased. Value of gross output and total output has been used in the text inter-changeable to mean the same thing.

Total Input: This comprises gross value of fuels, materials consumed as well (as defined above) and also other inputs viz. (a) cost of non-industrial services received from others (b) cost of materials consumed for repair and maintenance of factory's fixed assets including cost of work done by others to the factory's fixed assets (c) cost of contract and commission work done by others on materials supplied by the factory (d) cost of office supplies and products reported for sale during last year & used for further manufacture during the accounting year.

Gross Value Added = Total output- Total Input

Net Value Added = Gross Value Added- Depreciation

3.1 INDUSTRY GROUP WISE PERFORMANCE OF GVA FOR THE YEAR – 2012-13

Gross State Domestic Product measures the value of all goods and services produced during a given period of time within the geographical boundaries of the State. Gross State Domestic Product is equal to Gross Value Added (GSDP=GVA). The following table shows the industry wise contribution to GVA/NVA during 2012-13.

It reveals the distribution of Gross Value Added in terms of economic activities covered by 10279 factories generating Rs.28728.01 Crores of Net Value Added and Rs. 33974.63 Crores of Gross Value Added has been generated in the state during the year 2012-13. It is further observed that Manufacture of Pharmaceuticals, Medicinal clinical and Botanical products group (21) Rs.9977.97 Crores(29%), contributed major proportion to Gross Value Added followed by Manufacture of Electrical equipment (27) Rs. 3751.28 Crores(11%), Manufacturing of other Non-Metallic Mineral Products group (23) Rs.3065.96 Crores (9%) .

During the year i.e. 2012-13 the Manufacture sector (Groups 01 to 33) Gross value added is Rs.32932.14 Crores (97%) and remaining other Groups Gross value added is Rs.1042.49 Crores (3%).

3.2 Comparative Study with all India level: The estimates of some of the principle characteristics for all industries taken together at the state level when compared to all India Level for 2012-13 is given below:

ANNEXURE – X

CONCEPTS AND DEFINITIONS

Various terms relating to a accounting and economic aspects related to the factories are used in conduct of Annual Survey of Industries. For proper compilation / verification of ASI return, it is essential that the staff engaged in the conduct of ASI properly understands the terminology used in ASI. In this context, the concepts and definitions of some of the important terms are given below.

Accounting Year it is the period on which the factory closes its books of account from April to March.

Reference Period it is corresponding to financial year i.e., 1st April 2012 to 31st March, 2013.

Survey Period: The survey period for ASI 2012-13 is from September 2013 to April, 2014.

Factory: Factories one, which is registered under sections 2m (i) and 2m (ii) of the Factory Act, 1948. The sections 2m (i) and 2m (ii) refer to any premises including the precincts thereof

2m (i) :wherein ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on or

2m(ii):wherein twenty or more workers are working or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power , or is ordinarily so carried on.

Closed factories with fixed assets on site are also considered as registered factories till they are de-registered and removed from the live-register maintained by the Directorate of Factories in the State.

Physical Working Capital:

It include a) all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing.

b) Physical working capital also includes the value of stock of materials, fuels and stores etc. purchased expressly for re-sale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. Finished goods processed by others from raw materials supplied by the factory and held by them are included.

Excluded the stock of the materials, fuels, stores etc. supplied by others to the factory for processing. and finished goods processed by the factory from raw materials supplied by others, are excluded.

Working Capital: Working Capital is the sum total of the physical working capital and the cash deposits in hand and at bank and the net balance receivable over amounts payable at the end of the accounting year. Amounts receivable includes value of credit items on revenue account, such as sums due to the factory for goods sold, amounts advanced in connection with normal factory work, bills of exchange payable to the factory, payments made in advance such as for fire insurance, telephone charges, rates and taxes, call deposits and security deposits having a normal life of less than one year, etc. Working capital, however, excludes unused overdraft facility, fixed deposits irrespective of duration, advances for acquisition of fixed assets, long-term loans including interest thereon and investments.

Invested Capital: Invested Capital is the total of fixed capital and physical working capital

Productive Capital: This is the total of fixed capital and working capital.

Gross Value of Plant and Machinery: The total original (un depreciated) value of installed plant and machinery at the end of the accounting year. It includes the book value of own constructed plant and machinery, if installed, and the approximate value of rented-in plants and machinery as at the time of renting in but excludes the value of rented-out plants and machinery. Total value of all the plants and machinery acquired on hire-purchase basis is also included. Thus it represents the gross value of plant and machinery engaged in production process.

Outstanding Loans: Outstanding Loans represent all loans, whether short-term or long-term, whether, interest bearing or not.

Rent paid: Rent paid represents the amount of royalty paid in the nature of rent for the use of the fixed assets in the factory.

Interest paid: Interest paid includes all interest paid on factory account on loans, whether short term or long term, irrespective of the duration and the nature of agency from which the loan was taken. Interest paid to partners and proprietors on capital or loan are excluded.

Rent received: Rent received represents the amount of royalty received in the nature of rent for the use of the fixed assets in the factory.

Interest received: Interest received includes all interest received on factory account on loans, whether short term or long term, irrespective of the duration and the nature of agency to which the loan was given. Interest received from partners and proprietors on capital or loan are excluded.

Workers: Workers are defined to include all persons employed directly or through any agency whether for wages or not and engaged in any manufacturing process or in cleaning any part of the machinery or premises used for manufacturing process or in any other kind of work incidental to or connected with the manufacturing process or the subject of the

manufacturing process. Labour engaged in the repair and maintenance or production of fixed assets for factory's own use or labour employed for generating electricity or producing coal, gas etc. are included.

Contract Worker: All persons who are not employed directly by an employer but through the third agency, i.e., contractor, are termed as contract workers. Those workers may be employed with or without the knowledge of the principal employer.

Employees: Employees relate to all persons engaged by the factory whether for wages or not, in work connected directly or indirectly with the manufacturing process and include all administrative, technical and clerical staff as also labour in production of capital assets for factory's own use. This is inclusive of persons holding position of supervision or management or engaged in administrative office, store keeping section and welfare section, watch and ward staff, sales department as also those engaged in purchase of raw materials etc. and purchase of fixed assets for the factory.

It also includes all working proprietors and their family members who are actively engaged in the work of the factory even without any pay and the unpaid members of the co-operative societies who work in or for the factory in any direct and productive capacity. Persons in the head office connected with the manufacturing activity of the factory are also included in this item.

Wages and Salaries are defined to include all remuneration in monetary terms and also payable more or less regularly in each pay period to workers as compensation for work done during the accounting year. It includes (a) direct wages and salary (i.e., basic wages/salaries, payment of overtime, dearness, compensatory, house rent and other allowances); (b) remuneration for the period not worked (i.e., basic wages, salaries and allowances payable for leave period, paid holiday, lay-off payments and compensation for unemployment, if not paid from sources other than employers); (c) bonus and ex-gratia payment paid both at regular and less frequent intervals (i.e., incentive bonus, good attendance bonus, productive bonus, profit sharing bonus, festival or year-end bonus etc). It excludes layoff payments which are made from trust other special funds set up exclusively for this purpose i.e., payments not made by the employer. It also excludes imputed value of benefits in kind, employer's contribution to old age benefits and other social security charges, direct expenditure on maternity benefits crèches and other group benefits. Traveling and other expenditure incurred for business purposes and reimbursed by the employee are excluded. The wages are expressed in terms of gross value i.e., before deduction for fines, damages, taxes, provident fund, employee's state insurance contribution etc.

Bonus: Profit sharing bonus, festival bonus, year-end bonus and all other bonuses and ex-gratia payments paid at less frequent intervals are covered by this term.

Workmen and Staff welfare Expenses: These include expenditure incurred by the employer on the maternity benefits and crèches and other benefits such as supply of food,

beverages, tobacco, clothing and group lodging at concession rates and educational, cultural recreational facilities and services and grants to trade unions, co-operative stores etc. meant for employees. All group benefits are included.

Contribution to Provident Fund and Other Funds includes old age benefits like provident fund pension, gratuity etc. and employers contribution towards other social security charges such as employees state insurance, compensation for work injuries and occupational diseases, provident fund- linked insurance, retrenchment and lay off benefits.

Emoluments: These are defined as the same way as wages but paid to all employees plus imputed value of benefits in kind i.e. the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance etc. for payment by the factory also is included in the emoluments.

Mandays Worked: These are obtained by summing up the number of Mandays worked by persons working in each shift over all the shifts on all days, i.e., both manufacturing and non-manufacturing days. This figure excludes persons who are paid but remain on leave, strike, etc.

Mandays Paid for: The number of mandays paid for is arrived at by summing up the number of employees paid for in each shift. This also includes mandays on weekly schedule holidays if paid for and those absences with pay as also mandays lost through lay off / strike for which compensation was payable.

Working Day: Working Day means the days on which a manufacturing process and / or repair or maintenance work was carried on.

Non Working Day: Apart from manufacturing day and repair and maintenance days there may be some non-working days, are those days on which the workers give their attendance but due to non-availability of raw materials, power etc., no effective work is done. As the workers are paid for these days such days are also taken into account for the purpose of labour statistics.

Materials consumed: Materials consumed represent the total delivered value of all items of raw materials, components, chemicals, packing materials and stores which actually entered into the production process of the factory during the accounting year. It also includes the cost of all the materials used in the production of fixed assets, including construction work for factory's own use. Components and accessories fitted as purchased with the finished product during the accounting year are also to be included. It excludes

intermediate products, Intermediate products in the above context mean all those products which are produced by the factory and consumed for further manufacturing process.

Consumable Stores: All such materials which assist the manufacturing process and lose their identity without entering the products are called consumable stores, e.g., cotton waste.

Fuels consumed: Fuels consumed represents total purchase value of all items of fuels, lubricants, electricity, water (purchased to make steam) etc. consumed by the factory during the accounting year except those which directly enter into products as materials consumed. It excludes that part of fuels, which is produced and consumed by the factory in manufacturing i.e., all intermediate products and also fuels consumed by employees as part of amenities. It includes quantities acquired and consumed from allied concerns, their book value being taken as their purchase value and also the quantities consumed in production of machinery or other capital items for factory's own use.

Total Input: This comprises gross value of fuels, materials consumed as well (as defined above) and also other inputs viz. (a) cost of non-industrial services received from others (b) cost of materials consumed for repair and maintenance of factory's fixed assets including cost of work done by others to the factory's fixed assets (c) cost of contract and commission work done by others on materials supplied by the factory (d) cost of office supplies and products reported for sale during last year & used for further manufacture during the accounting year.

Intermediate Product: Intermediate product is a product which is obtained during a manufacturing process, which may or may not be saleable and is not the intended final product.

Net Value of Semi-finished Goods: It represents the excess / deficit of value of semi-finished goods and / or goods-in-process at the end of the accounting year over that at the beginning of year.

Products: These are defined to include the ex-factory value (i.e. exclusive of taxes duties etc. on sale and inclusive of subsidies etc., if any) of all products and by-products, excluding intermediate products, that have been completed during the accounting year for sale whether actually sold during the accounting year or entered into books. Also include fixed assets produced by the factory for its own use.

Gross Output: Gross Output is defined to include the ex-factory value, (i.e., exclusive of taxes, duties, etc. on sale and inclusive of subsidies etc., if any) of products and by-products manufactured during the accounting year, and the net value of the semi-finished goods, work-in-progress (represents the excess / deficit of value of semi-finished goods or work-in-progress at the end of the accounting year over that of the beginning of the year plus net balance of semi-finished fixed assets on factory's capital account) and also the

receipts for industrial and non-industrial services rendered to others, value of semi-finished goods of last year sold in the current year and sale value of goods sold in the same condition as purchased. Value of gross output and total output has been used in the text inter-changeable to mean the same thing.

Semi-finished goods: It refers to the imputed value of all materials which have been partially processed by the factory but which are not usually sold without further processing. It includes the work in progress for materials supplied by others, but excludes the value of semi-finished fixed assets produced for factory's own use.

Finished goods of the factory are the ultimate products ready for sale. It does not require further processing but includes packaging and labeling etc.

Imported Materials consumed on actual use: comprise the portion of materials consumed and which are imported from other countries. It may be raw materials or fuels or components and accessories of the input basket.

Industrial Services: Any services taken or rendered from one to another unit resulting in increase in the value of material during the manufacturing process are industrial services.

Non-Industrial Services: All such services which do not have a direct bearing on the manufacturing process but are needed by any manufacturing unit are called non-industrial services, say, transport.

Net Value Added: This is the increment to the value of goods and services that contributed by the factory and is obtained by deducting the value of total inputs and depreciation from gross value of output.

Captive Unit: Captive generating plant means a power plant set up by any person to generate electricity primarily for its (his) own use. Also, by this definition, a group of industries can set up a big generating station for their groups' use and sell excess power.

INDUSTRIES AND COMMERCE (IP & INF) DEPARTMENT

G.O.MS.No. 58

Dated: 29.08.2015
Read the following:-

1. Telangana State Industrial Project Approval and Self Certification System (TS-iPASS) Act, 2014 (Act No. 3 of 2014)
2. G.O.Rt. No. 1323, General Administration (SC-A) Department, dated.11.05.2015
3. G.O. Ms. No. 36, Industries & Commerce (IP & INF) Department, dated.17.06.2015

--o0o--

ORDER:

Government of Telangana, have announced new Industrial Policy to inspire international and domestic industry groups, investors and entrepreneurs to choose Telangana as a preferred destination. The policy lays out the framework for industrial activity and goes well beyond the single window system. The system of self certification, time bound approvals enormously enhanced the ease for doing business. Yet another important principle of the new industrial policy is minimum inspection and maximum facilitation. This framework is expected to result in inflow of huge investments into Telangana.

2. Accordingly, the Government in the reference 1st read above have enacted the "Telangana State Industrial Project Approval and Self Certification System (TSiPASS) Act, 2014". Further, the Government have also framed the "Telangana State Industrial Project Approval and Self Certification System (TS-iPASS) Rules, 2015" for implementation of the provisions of the Telangana State Industrial Project Approval and Self Certification System (TS-iPASS) Act, 2014 in the reference 3rd read above.

3. In order to create effective and efficient service delivery mechanism in important investment proposals, it is imperative to have a new and nonconventional approach and have effective mechanism for effective coordination between Industry and various Government Departments /Agencies which shall function as a one stop contact for the Industry to ensure delivery of services as per "Telangana State Industrial Project Approval and Self Certification System (TSiPASS) Act, 2014".

4. Government, after careful examination, hereby establish the "**Industry Chasing Cell**" in the office of the Hon'ble Chief Minister, Government of Telangana and its, focus, functions, organisation and other administrative arrangements shall be as detailed below.

i) Key Focus Areas:

- Major and Mega investments pertaining to any Department.
- Investments which are of strategic importance to Telangana State.
- Any other functions specifically assigned.

ii) Functions of chasing cell:

- a) Address all protocol requirements and facilitation services for Identified potential investors.
- b) Coordinate with various agencies and ensure timely approvals as per Telangana State Industrial Project Approval and Self Certification System (TS-iPASS).

- c) Provide effective facilitation to implement “Right to Clearance”.
- d) Provide requisite facilitation to the industry until it is established and goes on stream in accordance with TS-iPASS time lines.
- e) Identify process constraints at various stages of setting up of new industries / expansion/ revival etc., and make recommendations for streamlining.
- f) Document the best practices across the Globe and provide high quality inputs on policy and practice to Telangana State.
- g) Any other job as assigned from time-to-time towards effective implementation of Telangana State Industrial Project Approval and Self Certification System (TS-iPASS).

iii) Organization :

- a) The Additional Principal Secretary to the Hon’ble Chief Minister shall be the Ex-officio Chief Executive Officer of the Cell. The Chief Executive Officer will be supported by a Professional core team comprising of at least six members drawn from the various departments of Government on deputation and professionally qualified personnel from open market. The team working in Industry chasing cell shall be a healthy mix of departmental officials and consultants. Which will also ensure that department officials are trained overtime in the subject matter. It shall be an endeavour that work allocation & responsibility parity is maintained between the department staff & those drawn from outside.
- b) The Commissioner of Industries shall identify suitable officers in consultation with Secretary to Government Industries & Commerce Department and Additional Principal Secretary to the Hon’ble Chief Minister & Ex- officio Chief Executive Officer of ‘Industry Chasing Cell’ To be deputed to the chasing cell. The officers can be not only from Industries & Commerce Department but also from Pollution Control Board (PCB), Municipal Administration and Urban Development (MA &UD), Panchayat Raj & Rural Development (PR&RD), Factories, Labour, Law, Finance, Centre for Good Governance (CGG) & other such departments as deemed appropriate.
- c) With regard to the staff to be taken from open market, the hiring Process of Telangana State Industrial Infrastructure Corporation (TSIIC) in consultation with CGG may be adopted. Alternatively ‘Industry Chasing cell’ shall develop an objective and transparent method of hiring and propose to government for approval.

iv) Administrative and Programme Implementation arrangements:

- a) The Industry chasing cell shall report through Chief Secretary to Government to the Hon’ble Chief Minister directly.
 - b) The responsibility of assisting the Industry Chasing Cell lies with the Commissioner of Industries.
 - c) The Commissioner of Industries shall provide requisite facilitation services through General Manager, District Industries Centres to the Industry Chasing Cell.
- ii) The Commissioner of Industries shall initiate necessary action to create a separate budget head for ‘Industry chasing cell. Additional budget shall be released by Finance Department by indicating a suitable head of account. The Commissioner of Industries shall draw the budget for the ‘Industry chasing cell’ from this head of account as indicated by the Finance Department and will meet relevant expenses of the Chasing Cell.
 - iii) The Commissioner of Industries shall also issue detailed guidelines on administration and financial arrangements for Industry chasing cell, in consultation with the Government.

- d) Salaries, remuneration, logistics, travel, accommodation, etc and all Other expenditures pertaining to 'Industry Chasing Cell' as approved by Chief Executive Officer of the Cell will be met by the Commissioner of Industries from the budget head so created. The Commissioner of Industries shall ensure that all such expenses are met timely and if needed, can draw an advance from TSIIC subject to reimbursement from Finance Department under this head.
- 5) The 'Industry Chasing Cell' shall be operationalised the cell within a Period of one(1) month and necessary staff, both on deputation & from outside shall be procured as and when required duly following the process as laid down above.
- 6) This order issues with the concurrence of Finance Dept., vide their U.O. No.519/Spl.CS/15, dated. 03/07/2015 and 23/07/2015.
