INTRODUCTION

Sustainable growth in Agriculture continues to be core agenda for both the Central and State Governments. Agriculture sector is mainly rainfed and depends to a significant extent on the depleting ground water. As nearly 55.49 percent of the State’s population is dependent on some form of farm activity for their livelihoods, it is imperative to increase the farm incomes through different farm activities and ensuring sustainable growth in Telangana to reduce poverty. Highest priority is accorded to the Agriculture Sector in the State with the objective of shifting the excess labor force from this sector to other non-farm rural sectors such as rural industry through skill development. Ensuring food security and provision of gainful employment continues to be the essential premise of the socio economic development and employment guarantee schemes like MGNREGS and Rural livelihoods programmes.

The share of agriculture to state GVA at basic prices in 2014-15 is 9.6 percent at current prices. Agriculture and allied sectors constitute crop husbandry (agriculture, horticulture), livestock, forestry and fisheries sectors. The share of crop husbandry sector in agriculture and allied sector GSDP is declining overtime.

The share of livestock sector is around one third of total GVA of agriculture and allied sectors during 2014-15. The contribution of this sector is stable as compared to that of crop sector during the last decade. The growth of livestock sector gains significance in the light of the decline in the share of agriculture and allied activities in the total GVA of the State. The details are shown below.

Share of allied sectors in Agriculture GVA at Current Prices

Sector	2011-12*	2014-15
Crop Husbandry Sector	59.26	54.78
Livestock	34.57	38.22
Forestry and Logging	3.70	3.18
Fisheries	2.47	3.82
Total Agriculture Sector	100.00	100.00
Share of Agriculture and Allied Sector in GVA	16.14	15.67

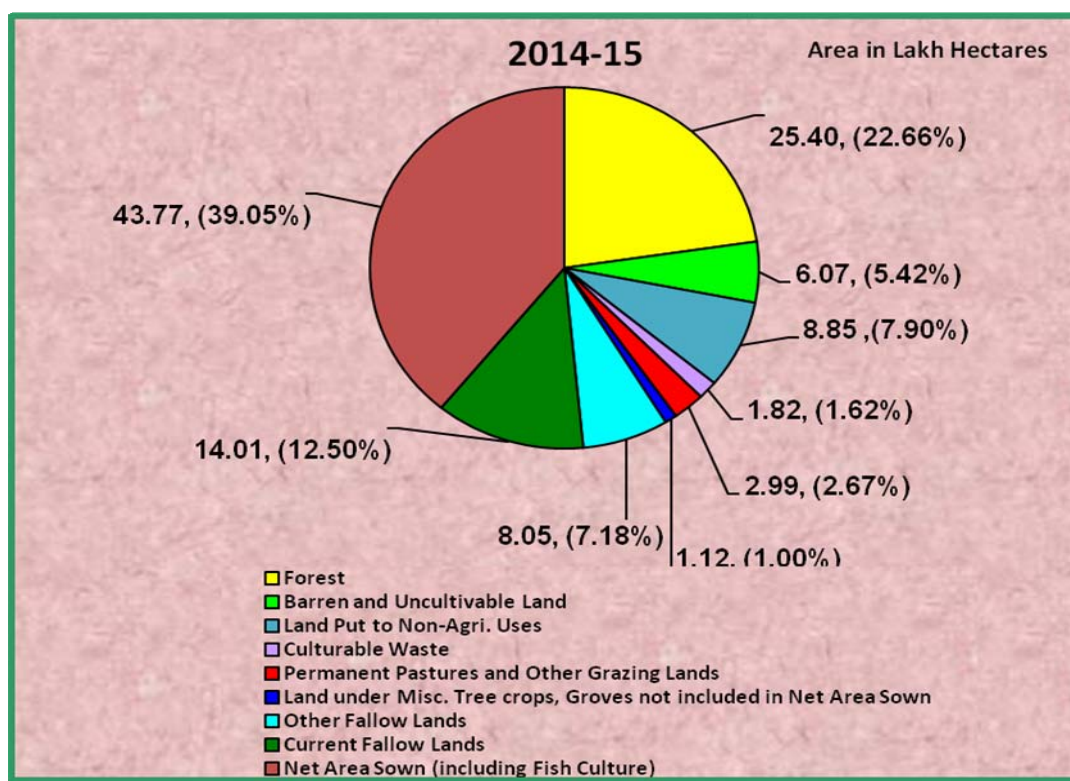

Land Utilization

Out of the total geographical area of 112.08 lakh hectares, The area under forest cover is 25.40 lakh hectares, constituting 22.66 % of the geographic area. The proportion of area under forest was lower than the ideal ratio of one third of total geographical area, about 39.05 percent area is under cultivation (43.77 lakh hectares), 12.50 percent area is under Current Fallow Lands (14.01 lakh hectares), 7.90 percent area is put to non-agricultural uses (8.85 lakh hectares), 5.42 percent area is barren and uncultivable (6.07 lakh hectares) , 7.18 percent falls under other fallows (8.05 lakh hectares) and the remaining 5.29 percent is under culturable waste, permanent pastures and other grazing lands and land under miscellaneous tree crops and groves, which is not included in the net area sown (5.93 lakh hectares).

THE PATTERN OF LAND USE UNDER VARIOUS CATEGORIES are given BELOW.

Sl. no	Category	Area in Lakh hectares

3 Distribution of Land Use:

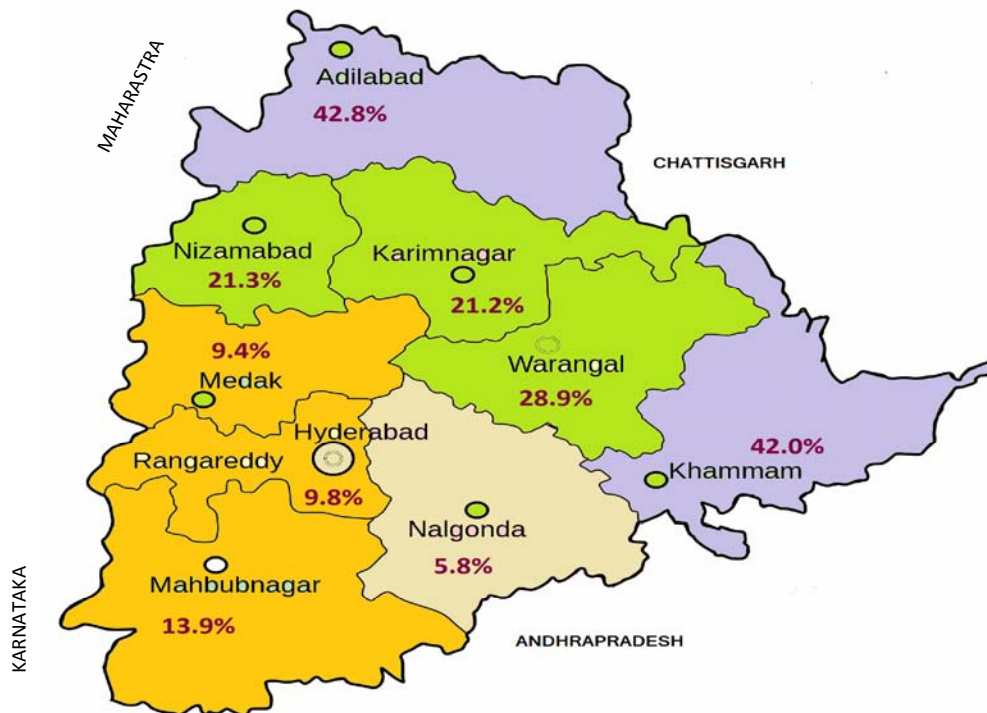

3.3.1 Forests

Area under forests, includes all lands classified as forests under any legal enactment dealing with forests or administered as forests, whether state owned or private and whether weeded or maintained as potential forest land. The area of crop raised in the forest and grazing lands or area open for grazing within the forests should remain included under the forest area.

The Forest area of the State during 2014-15 is 25.40 lakh hectares accounting for 22.66 percent of the total geographical area in the State. Khammam, Adilabad and Warangal districts have proportionally more area under forests and these districts together accounted to nearly 63.67 percent of the total forest area in the State during 2014-15.

The percentage of area under forest to total geographical area in each district during 2014-15 is shown in map.

PERCENTAGE OF FOREST AREA TO GEOGRAPHICAL AREA DURING 2014-15

Land Put to Non - Agricultural Uses:

This includes all lands occupied by buildings, Roads, Factories and Railways and under water lands i.e. rivers, canals and other lands which put to uses other than agriculture. The area under this category is 8.85 lakh hectares accounting for 7.90 percent of the total geographical area in the state during 2014-15 as against 8.80 lakh hectares in 2013-14, recording an increase of 0.57 percent over previous year.

The land put to Non Agricultural uses is further bifurcated into 4 sub groups namely Water Logged Area (0.06 Lakh hectares), Social Forestry (0.07 lakh hectares) , Land Under Still Water (2.45 lakh hectares) and Others (6.27 lakh hectares)

Barren and Uncultivable Land:

This covers all barren and uncultivable land like mountains, deserts, etc., Land which cannot be brought under cultivation unless at a high cost shall be classified as barren and uncultivable, whether such land is in isolated blocks or within cultivated holdings. An extent of 6.07 lakh hectares of land comes under barren and uncultivable land which represents 5.42 percent of the total geographical area in the State.

Permanent Pastures and Other Grazing Lands:

Permanent Pastures and Other Grazing Lands covers all grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands under the head common grazing lands shall be included under this category. An extent of 2.99 lakh hectares of land comes under permanent pastures and other grazing lands which accounts for 2.67 percent of the Total Geographical area in the State.

Miscellaneous Tree Crops and Groves not included in the Net Area Sown:

It includes all cultivable land which is not included under net area sown but is put to some agricultural use. Lands under , thatching grass, and other groves for fuel etc. which are not included under orchards shall be included under this category. Total land under this category was 1.12 lakh hectares accounts for 1.00 percent of the total Geographical area in the State.

Culturable Waste:

This include all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and also in last five years or more in succession for one season in a year i.e., land which kept fallow for more than 5 years classified as culturable waste. It formed 1.62 percent of the total Geographical area in the state during 2014-15. The area under culturable waste in 2014-15 was 1.82 lakh hectares as against 1.77 lakh hectares in 2013-14, showing an increase of 2.82 percent over Previous year.

Other Fallow Lands:

This implies all lands, which were taken up for cultivation but are temporarily out of cultivation for a period not less than a year and not more than five years. An extent of 8.05 lakh hectares which accounts for 7.18 percent of the total geographical area was reported under this category. The area under other fallow lands was 8.05 lakh hectares during 2014-15 as against 7.17 lakh hectares in 2013-14. showing an increase of 12.27 percent over previous year.

Current Fallows:

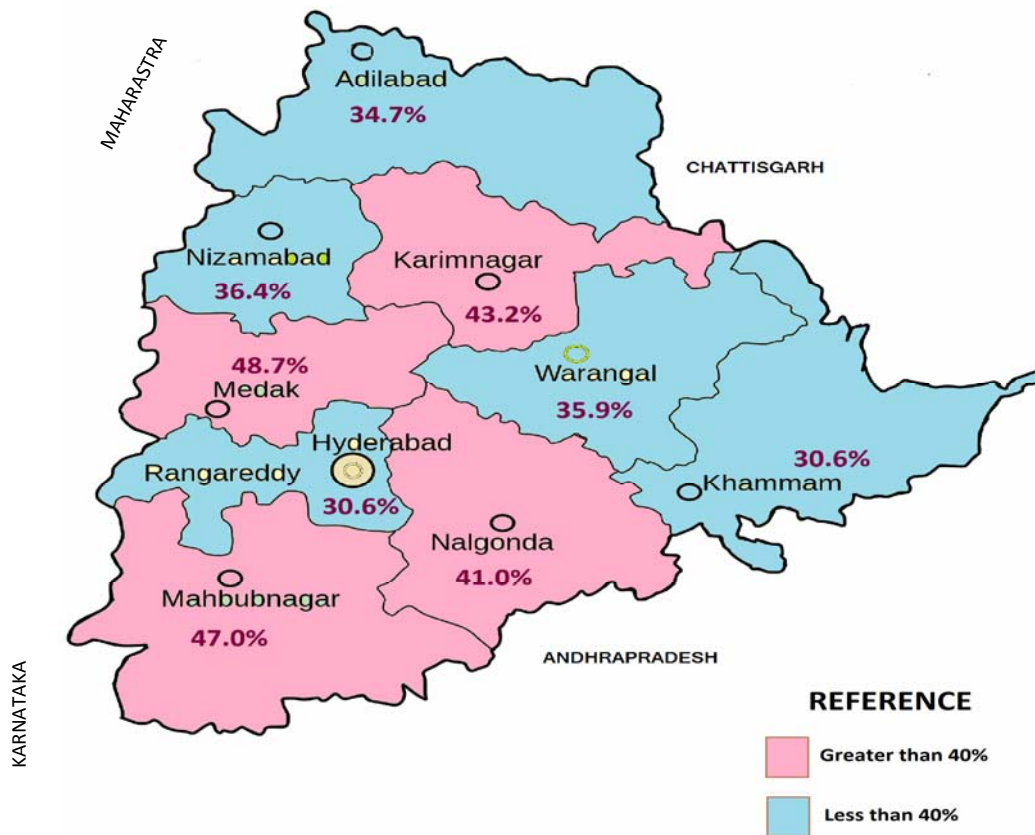

This class comprises areas, which are kept fallow during the current year only. If any, cultivated area is not cropped in the current year, it may be treated as current fallow. The area under current fallow during 2014-15 was 14.01 lakh hectares as against 9.51 lakh hectares in 2013-14 showing an increase of 47.32 percent over previous year, this increase may be attributed to adverse seasonal conditions and insufficient water in Irrigation sources.

Net Area Sown

Net Area sown represents total area sown with the crops and orchards. Counting of area sown more than once in the same year have to be shown only once. The Net Area sown during 2014-15 was 43.77 lakh hectares represents 39.05 percent of total Geographical area. The Net Area sown during 2014-15 is 43.77 lakh hectares as against 49.23 lakh hectares showing a decrease of 11.09 % over previous year. The decrease in Net area sown was due to insufficient Rains/ Drought conditions.

**PERCENTAGE OF NET AREA SOWN TO GEOGRAPHICAL AREA DURING 2014-15
IN TELANGANA STATE**

- District wise details are in table II of Page .No 128 & 129

Gross Area Sown

Gross area sown represents total area cultivated under all food and non-food crops, including the area sown more than once during the agricultural year. The gross area sown or gross cropped area during 2014-15 is 53.15 lakh hectares as against 62.44 lakh hectares in 2013-14, showing a decrease of 14.88 percent, this decrease was due to unfavorable seasonal conditions and non availability of water in Irrigation sources.

Area Sown More Than Once

Area on which crops are cultivated more than once during the agricultural year. During the year 2014-15 it was 9.38 lakh hectares as against 13.21 lakh hectares in 2013-14 showing, a decrease of 28.99 percent. The area sown more than once constituted 21.43 percent of net area sown in the state .

Cropping Intensity

Cropping intensity is one of the indices for assessing the efficiency of agriculture sectors. The cropping intensity is the ratio of gross cropped area to Net cropped area . The cropping intensity for the year 2014-15 was 1.21 against 1.27 in 2013-14 showing a decrease of 4.72 % over previous year. The Crop/Cropping intensity is highest in Nizamabad district (1.55 %) followed by Karimnagar 1.37 and Warangal 1.29 respectively. Crop/Cropping intensity was lowest i.e.,1.08 in Adilabad District. The level of cropping intensity moves on accordance with the behavior of the monsoon and availability of water in Irrigation Sources.

Land Holdings

As per the Agricultural Census, 2010-11, the number of holdings in the state accounted to 55.54 lakh and the area held by these holdings was 61.97 lakh hectares. The average size of the holdings in the State is 1.12 hectares, which is highly uneconomical to operate. In the State, 62.0 percent of the holdings are marginal (less than 1 hectare) and the percentage of small holdings (1 to 2 hectares) is 23.9%. Thus, marginal and small holdings constitute about 85.9% of total agricultural holdings in the State, making agriculture a subsistence source of livelihood for the majority of the population of the State.

- ⇒ More than 60% holdings are marginal in Nizamabad, Karimnagar, Medak, Khammam and Warangal districts.
- ⇒ Percentage of area held by semi medium and small holdings is lower than marginal holdings.
- ⇒ Average size of land holding is highest (1.40 ha.) for Adilabad District and lowest (0.92 ha.) for Nizamabad District.

DISTRICT WISE RAINFALL SCENARIO DURING THE YEAR 2014-15(JUNE 2014 TO MAY 2015)

SOURCES WISE IRRIGATED AREA

Any crop which is irrigated at least once before getting harvested is called as an irrigated crop . Basing on the clarification given in G.O.M.S No 265 of Rev Dept Dt 18.3.92 , the cropped areas are classified as irrigated and un irrigated areas.

The gap between average yield and the yields of irrigated and un-irrigated tracts is so wide that for proper assessment of production potentialities, it is essential to have separate data for irrigated and un-irrigated areas, according to different sources of irrigation and different crops.

The main sources of irrigation in Telangana are tube wells , dug wells , canals and tanks.

Net area irrigated by all sources during 2014-15 was 17.26 lakh hectares as against 22.80 lakh hectares in 2013-14 showing decrease of 24.30 percent.

The net area irrigated during 2014-15 constituted 39.44 percent of net area sown in the State. The net area irrigated by wells constituted 81.87 percent of total area irrigated under all sources.

Karimnagar and Warangal districts are top with 3.16 and 2.76 lakh hectares respectively of total net area irrigated during 2014-15. The source-wise net area irrigated is given in Table-4.1

The net area irrigated and percentage of irrigation by different sources in the state during 2014-15 is shown in the graph .

Canals

During 2014-15, canal irrigation contributed 10.08 per cent of the net area irrigated by all sources in the State. The net area irrigated by canals during the year 2014-15 was 1.74 lakh hectares as against 2.89 lakh hectares in 2013-14 showing a significant decrease of 39.79 percent due to non availability of water in most of the canals. The highest net area irrigated under canals is in Nalgonda district which accounts for 0.67 lakh hectares constituting 38.51 percent of the total net irrigated area under canals in the State. Khammam District ranks next, which accounts for 0.51 lakh hectares constituting 29.31 percent of the total Net area Irrigated in the State.

Tanks

Tanks are fed partly from independent catchment areas and partly from the diversion of river water and jungle streams. Thus they fully depend on rain. The tanks which get supply from permanent storages like reservoirs, dams etc. are also classified under this category. The net area irrigated by tanks during 2014-15 was 0.97 lakh hectares as against 2.28 lakh hectares in 2013-14 showing a significant decrease i.e., 57.46 percent. The net area irrigated by Tanks in Khammam district is highest i.e 0.33 lakh hectares or 34.02 percentage of the total net area irrigated by tanks in the State. The next district in rank is Karimnagar district with an area of 0.18 lakh hectares or 18.56 percent of the total area irrigated under tanks in the State.

Wells

Wells are the Major source of Irrigation in Telangana State. Wells includes tube wells and Dug wells . The net area irrigated by wells (Dug and tube wells together) during the year 2014-15 was 14.13 lakh hectares as against 17.11 lakh hectares in 2013-14 showing a decrease of 17.42 percent over the previous year. Well irrigation is predominant in the Districts of the Karimnagar, Warangal, Mahabubnagar, Nalgonda accounted for 64.41 percent of the total net area irrigated in the State under Wells during 2014-15.

Other Sources

Other sources consist of lift Irrigation schemes, Springs, Bandams, Kuntas and others not included any where. An area of 0.42 lakh hectares is irrigated under other sources during 2014-15 as against 0.52 lakh hectares during 2013-14 which shows a decrease of 19.23 % over previous year. The major portion of the area under other sources is covered by Mahabubnagar, Nalgonda and Khammam districts which together accounted for 75.65. percent of the total net area irrigated by other sources in the State.

Gross Area Irrigated

4.2 Gross area irrigated is the total irrigated area under various sources during the year. This area also accounts the area irrigated more than once during the same year. The gross area irrigated during 2014-15 was decreased to 25.29 lakh hectares from 31.55 lakh hectares in 2013-14, the decrease being 19.84 percentage. The decrease in gross area is reflected under all sources of Irrigation. The gross area irrigated under Canals, Tanks , Wells(Tube and Dug wells together) and other sources is decreased by 48.30 % , 59.79 % , 9.34 % and 18.57 % respectively during the Year 2014-15 when compared to the previous year. i.e 2013-14, area under Canals decreased significantly from 4.70 lakh hectares to 2.43 lakh hectares showing a decrease of 48.30% during the current year.

Irrigation Intensity

4.3 The irrigation intensity (the ratio of gross irrigated area to net irrigated area) is 1.47 in 2014-15 and it was 1.38 during 2013-14 . The ratio is recorded higher than the state average in the districts of Nizamabad(1.84), followed by Karimnagar (1.59) Nalgonda (1.52), Medak (1.48) & lower in Warangal (1.37),Adilabad (1.32) Rangareddy (1.33), Mahabubnagar(1.33) and Khammam (1.23) .

5. CROPPING PATTERN

5.1 Cropping pattern means the proportionate area under different crops during an Agricultural year. rice, wheat, millets, pulses, condiments & spices, sugarcane, vegetables and fruits constitute food crops . Rice is the major staple crop in food crops. Non-food crops constitute fibres, Oilseeds, Pulp& Timber, Drugs and Narcotics including Tobacco, fodder crops, Green manure crops, Aromatic Plants, Flowers and Others. The gross cropped area under all crops was decreased to 53.15 lakh hectares during 2014-15 from 62.44 lakh hectares in 2013-14, showing a decrease of 14.88 percent. The area under different crops and their percentage to total cropped area during 2014-15 and 2013-14 with the average of preceding 5 years is given in table 5.1.(Refer Page No.27 and 28)

5.2 Area Under Food Crops:

Besides food grain crops, condiments and spices sugarcane, fruits and vegetables also constitute food crops. Out of 53.15 lakh hectares of total cropped area during the year 2014-15, 30.68 lakh hectares or 57.72 percent was under food crops. The area under food crops in the State during 2014-15 is 30.68 lakh hectares as against 38.97 lakh hectares in 2013-14 showing a decrease of 21.27 percent over previous year.

5.3 Area Under Non-Food Crops

Non-food crops constitute Fibres, Oil seeds, Pulp & Timber, Drugs and Narcotics, Fodder crops and Green Manure crops, Aromatic Plants, Flowers and Others. The area under Non-food crops during 2014-15 is 22.47 lakh hectares constituting 42.28 percent of the total cropped area. The area under Non-Food crops during 2014-15 was decreased to 22.47 lakh hectares from 23.47 lakh hectares in 2013-14, with a decrease of 4.26 percent over previous year.

5.4 Area Under Food grain Crops

Out of 53.15 lakh hectares of total cropped area during 2014-15, 26.13 lakh hectares or 49.16 percent of the total cropped Area was accounted for total food grain crops viz., Rice, Wheat, Jowar, Bajra, Ragi, Maize, Minor millets and Pulses. Rice, Maize and Redgram crops together accounted for 43.80 percent of the total cropped area and 89.09 % of total food grain Crops in the state during 2014-15. The area under food grains is 26.13 lakh hectares during 2014-15 as against 34.31 lakh hectares in 2013-14. Which shows a decrease of 23.84 percent over previous year area under food grain crops.

Area Under Kharif Food-grain Crops

Area under food-grains during kharif 2014-15 was 18.00 lakh hectares as against 22.04 lakh hectares in 2013-14, showing a decrease of 18.33 percent over corresponding period of Previous year. Area under Kharif food grain crops decreased by 4.04 lakh Hectares during 2014-15 over 2013-14 .

Area Under Rabi Food-grain Crops

The area under food grains during Rabi season 2014-15 was 8.13 lakh hectares as against 12.27 lakh hectares in 2013-14, showing a decrease of 33.74 % over corresponding period of previous year.

The State recorded a significant decrease i.e., 23.84 percent under food grain crops during the current year over previous year.

Food-grains Production

The total food grains production in the State is 72.18 lakh tonnes in 2014-15 as against 106.86 lakh tonnes in 2013-14 showing a decrease of 32.45 percent over previous year. The decrease is being attributed to significant decrease in rabi food grain production during 2014-15. The production is decreased due to insufficient rains and inadequate water in irrigation sources during 2014-15 over 2013-14.

Kharif Food-grain Production

The production of food grains during Kharif season 2014-15 was 44.72 lakh tonnes as against 65.28 lakh tonnes in 2013-14, showing a decrease of 31.50 percent. The production is decreased in all the districts in the State during Kharif 2014-15 over previous year.

Rabi Food-grains Production

The production of Rabi food grains was 27.46 lakh tonnes in 2014-15 as against the 41.58 lakh tonnes in 2013-14, showing a decrease of 33.96 percent. The Production is decreased in all the districts in the State during Rabi 2014-15.

The Area and Production figures of food grains from 2010-11 to 2014-15 is given in Table 5.2.

6. AREA, PRODUCTIVITY AND PRODUCTION

6.1 Rice:

6.1.1 Rice is the principal crop extensively cultivated in all the districts of the State both in Kharif and Rabi seasons. Paddy crop accounted for 26.62 percent of the total cropped area and 54.15 percent of the total area under Food-grain crops during 2014-15. The area under Rice during 2014-15 was 14.15 lakh hectares as against 19.95 lakh hectares in 2013-14, showing a decrease of 29.07 percent over previous year Areas. The area under Rice decreased due to unfavorable seasonal conditions and inadequate water in Irrigation Sources during the current year. The Nalgonda District is at the top with an area of 3.23 lakh hectares followed by Karimnagar 2.78 lakh hectares, Nizamabad 1.69 lakh hectares, Mahabubnagar 1.61 lakh hectares, Khammam 1.46 lakh hectares and Warangal 1.42 lakh hectares.

6.1.2 The production of Rice during 2014-15 was at 45.45 lakh tonnes as against 65.81 lakh tonnes in 2013-14, showing a decrease of 30.94 percent over previous year. The Production was decreased due to decrease in the area significantly and unfavorable seasonal conditions during the current year when compared to previous year.

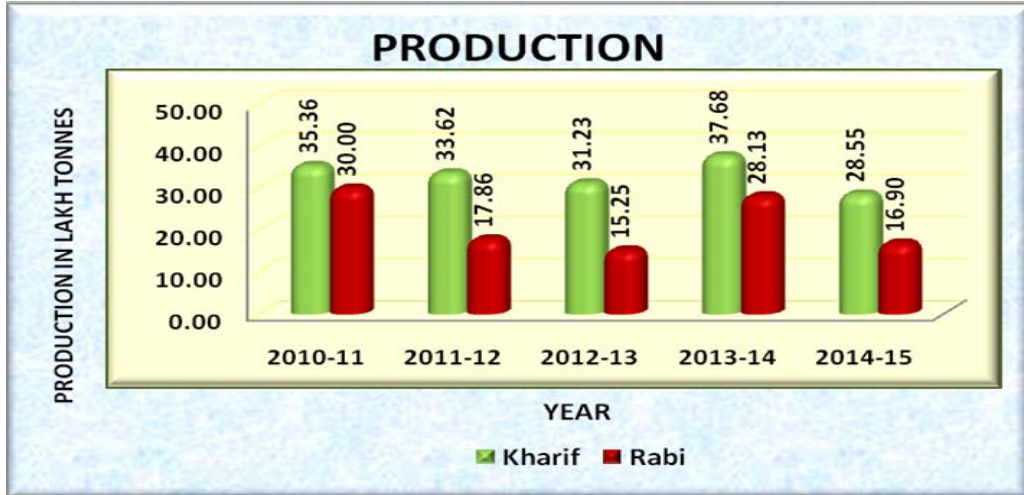

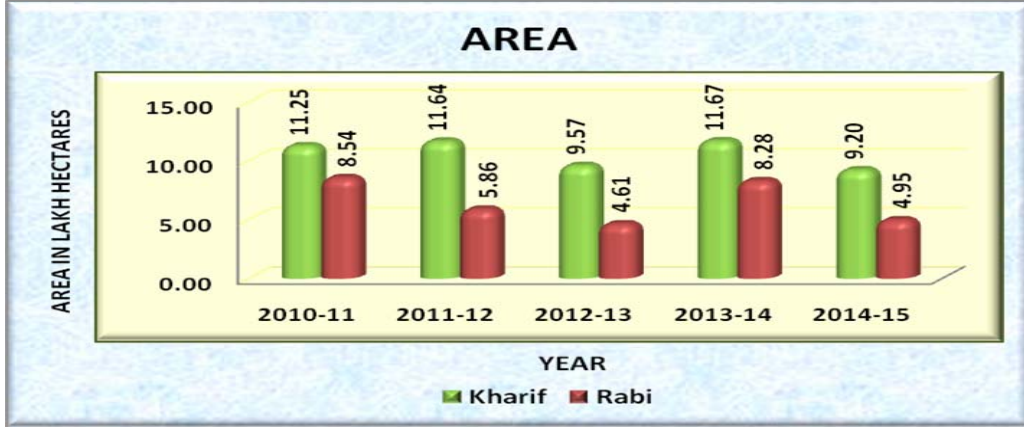

6.1.3 The productivity of Rice is 3211 Kgs/hect in 2014-15 as against 3300 Kgs/hect. in 2013-14 showing a decrease of 2.70 percent over previous year. The area, productivity and production of Rice in the State for the last 5 years i.e., from 2010-11 to 2014-15 are presented in table 6.1.

The production of pulses was 2.62 lakh tonnes during 2014-15 as against 4.65 lakh tonnes in 2013-14, showing a decrease of 43.66 percent over previous year. The decrease in production is due to decrease in the area under pulses crops and also decrease in yields of major pulses crops during 2014-15. The area and production of pulses from 2010-11 to 2014-15 are shown in the Table 6.7.

6.9. BENGAL GRAM

6.9.1. Bengal gram is mostly grown in Rabi season. The crop is sown in the month of October and November and in limited extent in the month of December also. The crop is grown extensively under rainfed conditions. The crop is predominantly grown in Mahabubnagar, Adilabad, Medak, Nizamabad and Rangareddy Districts which together accounted for 95.17 percent of the total area under the crop in the state during 2014-15 and Mahabubnagar district alone accounts for 35.51 percent of the total area under the Bengalgram crop in the State. The area under Bengalgram Crop during 2014-15 is at 0.59 lakh hectares as against 1.14 lakh hectares in 2013-14, showing a significant decrease of 48.25 percent during the current year over previous year.
