## AGRICULTURAL STATISTICS AT A GLANCE TELANGANA 2015-16

DIRECTORATE OF ECONOMICS & STATISTICS  
TELANGANA, HYDERABAD - 500 004

# **AGRICULTURAL STATISTICS AT A GLANCE TELANGANA 2015-16**

**DIRECTORATE OF ECONOMICS AND STATISTICS  
GOVERNMENT OF TELANGANA  
HYDERABAD-500 004**

**Dr.V.Subramanyam**  
**Director**

**Directorate of Economics and  
Statistics, Hyderabad**

## **Foreword**

The Directorate of Economics and Statistics, Hyderabad is releasing the publication of "**Agricultural Statistics at a Glance**" every year. It gives a broad sketch of the Agricultural scenario in the state during the year. It covers the Rainfall, Seasonal conditions, Area, Productivity and Production of crops, Land Utilization particulars and other information relating to Agriculture. The Publication of Agricultural Statistics at a Glance 2015-16 is the third in Series.

In this Publication, the information pertaining to Time Series data on Rainfall, Crop wise and Season wise Irrigated / Un-irrigated Areas, Productivity and Production particulars of crops, category wise Number and Area of Operational Holdings, Live Stock Population, Production of Milk, Eggs and wool, Fish and Prawn production and achievements under procurement of Rice, Gross State Domestic Product of Agriculture sector, Inter State Comparison of Area, Yield, Production of Important Crops and other information relating to Agriculture.

To facilitate greater access of data, this publication is disseminated in e-mode with limited number of hard copies. The e-publication is available in the official website (<http://ecostat.telangana.gov.in>) in the user friendly format to enable the interested users to download data directly.

I hope that this Publication will be useful to the policy makers, planners, Administrators, Research scholars who are dealing with Agricultural Statistics and it is also useful to others who are interested in Agricultural Statistics.

I wish to record my sincere appreciation to the Officers and Staff of Agricultural Section, other related Sections of Directorate of Economics and Statistics, Telangana & various departments who provided the data in bringing out the publication within a short time on 31-07-2016.

Constructive Suggestions to improve the Quality and content will be appreciated.

## INDEX

Sl. No.	Item	Page No.
	Overview and Summary	1-6
1	Rainfall Statistics	7-16
2	Land Utilization and Land use Particulars	17-25
3	Ground Water	26-27
4	Land Holding pattern	28-31
5	Agro climatic Zones	32-33
6	Agricultural Production Scenario	34-41
7	Horticulture	42-44
8	Area, Production and Yield of Principal crops	46-106
9	Index Number of Agricultural Production 2015-16	107-120
10	Season wise Farm Harvest Prices (weighted Average) for the selected Agricultural commodities 2015-16	121-122
11	Agricultural GVO of Telangana State at current and constant (2011-12) prices For the year 2014-15(FRE)	123-131
12	Cultivators and Agriculture workers	132
13	Live stock and Fisheries	133-136
Annexure No	Item	Page No.
Annexure-1	Month wise and Monsoon wise Rainfall 1990-91 to 2015-16	137-142
Annexure-2	Crop wise, Season wise Irrigated and Un-irrigated cropped area for the year 2015-16	143-150
Annexure-3	Gross Area sown, Area sown more than once and Net Area sown (1990-91 to 2015-16)	151
Annexure - 4	Season -wise Total Cropped Area (1990-91 to 2015-16)	152
Annexure-5	Crop-wise Area irrigated (1997-98 to 2015-16)	153-156
Annexure – 6	Season-wise Food grains Production (1990-91 to 2015-16)	157-158
Annexure – 7	Kharif and Rabi Normal Areas (2015-16 and 2016-17)	159-168
Annexure – 8	Inter state comparison of principal crops for the year 2014-15	169-181
Annexure – 9	District wise Agricultural Electric Services (2013-14 and 2014-15)	182
Annexure – 10	Scheme wise number of Minor Irrigation sources potential created and area irrigated during 3rd and 4th Minor irrigation census	183
Annexure – 11	Achievement of procurement of Rice from 2006-07 to 2015-16	184-185
Annexure – 12	Consumption of Chemical Fertilizers	186
	<b><u>APPENDIX</u></b>	
Appendix –I	Glossary of Botanical, English and Telugu Names of Crops	187-188
Appendix –II	Conversion Coefficient	189

## Overview

The State of Telangana emerged as 29<sup>th</sup> State in the Indian Union as per the Andhra Pradesh Reorganization Act, 2014 (No.6 of 2014) of Parliament with a geographical area of 1.12078 lakh sq.kilometers and a population of 350.04 lakhs (2011 census), the new State of Telangana is the twelfth largest State in terms of both area and the size of population in the country .The State is bordered by Maharashtra and Chhattisgarh in the north, Karnataka in the west and Andhra Pradesh in the south and the east. The State is situated in the Deccan plateau.

Two major rivers, the Krishna and the Godavari pass through the State. The major part of catchment area of the Godavari and the Krishna river. Despite large proportion of the catchment of these major rivers lying in the State, the present utilization of these river waters in the State is decimal .

The Economy of Telangana is mainly driven by agriculture. The better performance of this sector is vital for inclusive growth. Sustainable growth in Agriculture continues to be core agenda of the Government. In Telangana state, it mainly depends to a significant extent on the ground water and rainfed. As nearly 55.49 percent of the State's population is dependent on some form of farm activity for their livelihoods, it is imperative to increase the farm incomes and ensuring sustainable growth to reduce poverty.

**CLIMATE:** Telangana state is geographically located in a semi-arid area and has a predominantly hot and dry climate. Summer starts in March and peak in May with average high temperatures in the 42 °C (108 °F) range. The monsoons enter in the state in June and lasts until September with about 713 mm of precipitation ending south west monsoon . A dry, mild winter starts in late November and lasts until early February with little humidity and average temperatures in the 22–23 °C (72–73 °F) range. It is also prone to hailstorms in some areas in the month of April and May, some times.

**DROUGHT PRONE :** On analyzing of last 30 years data on drought in Telangana State the State had experienced 23 years as drought affected in some mandals or others, only during 7 years none of the Mandals in the State declared as drought affected. Out of total net sown area, major area depends on rainfed cultivation. Shortage of rainfall coupled with its erratic distribution during rainy season causes severe water deficit conditions.

Shortage of rainfall results in deficiency of soil moisture in the crop root zone , to support crop growth, productivity and lowering of water levels in tanks, lakes, reservoirs resulting in various types of drought. Non availability of sufficient irrigation facilities , erratic distribution of rainfall, limitations on the front of ground water exploration makes parts of the Telangana State drought prone. The changes in the monsoon pattern also add to the cause for proneness to droughts in Telangana State. Four districts viz., Nalgonda, Mahabubnagar, Rangareddy and Medak are most susceptible drought in the State.

### **Agro-climatic Zones**

Based on rainfall, type of soils and cropping pattern, etc., the State is divided into four agro-climatic zones. These are 1) Northern Telangana (Karimnagar, Nizamabad and Adilabad districts) 2) Central Telangana Zone (Warangal, Khammam and Medak districts) 3) Southern Telangana zone (Mahabubnagar, Nalgonda Rangareddy and Hyderabad districts) and 4) High Altitude and Tribal Areas Zone ( High Altitude and Tribal areas of Khammam and Adilabad districts).

### **Land Use**

The total land area of the State is 112.08 lakh hectares, out of which the area under forest cover is 25.40 lakh hectares, constituting 22.66 percent of the geographic area. 37.25 percent of the area is under cultivation. Waste lands constitute about 5.42 percent of total area in the state, Land put to Non agricultural uses, Culturable waste, Permanent pastures and Other grazing lands, land under Misc. tree crops, groves not included in Net area sown, Other fallow lands and Current fallow lands constitutes about 7.96, 1.62, 2.67, 1.00, 7.33 and 14.09 respectively.

### **Agricultural Holdings**

As per the Agricultural Census, 2010-11, the number of agricultural holdings in the State amounted to 55.54 lakh and the area held by these holdings was 61.97 lakh hectares. The average size of the holding in the State is 1.12 hectares, which is highly uneconomical to operate. Another area of concern is that 62.0 percent of the holdings are marginal (less than 1 hectare) and the percentage of small holdings (1 to 2 hectares) is 23.9 percent. Thus, marginal and small holdings constitute 85.9 percent of total agricultural holdings in the State, making agriculture a subsistence source of livelihood for the majority of population in the State.

## **Agriculture Production**

Agriculture sector is mainly rain fed and depends to a significant extent on the depleting ground water. In 2015-16, food grains were grown in an area of 26.18 lakh hectares (gross cropped area) with food production amounting to 51.45 lakh tones. Of the area under food crops, cereals and pulses account for 45.1 percent and 18.0 percent, respectively. The major cereals cultivated in the State are green gram, red gram, Bengal gram and black gram. Gross cropped area under non food crops is 22.75 lakh hectares. The proportion of area under food crops in the gross cropped area is 53.51 percent.

## **Productivity**

Agriculture in the State is characterized by stagnant yields and year to year fluctuations in yield levels. The index of agricultural productivity in the State (2007-08=100) has more or less remained constant. The index of productivity of pulses declined to 70.70 in 2015-16. The productivity of rice, which is the predominant crop in the State has been witnessing large year to year fluctuations making its cultivation un remunerative. The index fluctuated to a low of 63.47 in 2015-16 from 71.90 in 2013-14. The Productivity of Cotton, one of the major commercial crops, has also been witnessing large year to year fluctuations with the index varying large year to year fluctuations with the index varying from 44.20 in 2011-12 to 124.90 in 2015-16. There has been a significant decline in the productivity of sugarcane. In the year 2015-16, the index was 75.45.

The pressure on agricultural land is ever increasing for industrialization, urbanization, housing, infrastructure and others. All these factors are forcing for conversion of agricultural Land to non-agricultural uses as a result of it, the scope for expansion of the area available for cultivation is coming down to that extent, ultimately decrease in net area sown. Rice is the major staple crop in food crops. Other important crops grown are Maize, Jowar, Red gram, Green gram, Bengal gram, Groundnut, Soya bean, Mango, Cotton, Chillies, Sugarcane etc.

## **SUMMARY**

*2015-16 had a difficult year for agriculture, as this was the second consecutive year of deficient rainfall, resulting in severe drought situation in the State.*

*As a result of it , the water used declined to significant level, as no irrigation tank and Project have received notable level.*

*Agriculture and allied sector's contribution to Gross Value Added (GVA) at current prices for the year 2015-16 (AE) is about 14 percent, declined from 16.1 percent in 2011-12. Agriculture and allied sector during 2015-16 is likely to record a negative growth of -1.1 percent at current prices. Within the sector, the sub sector pertaining to agriculture crops was badly affected due to adverse seasonal conditions and is estimated to record a negative growth of -13.3 percent at current prices.*

### **RAINFALL**

- The actual rainfall received during South-West monsoon of 2014-15 was 494.7 mm as against the normal rainfall of 713.6 mm, recording a deficit of -31%. There was a deficit in rainfall in nine out of ten districts in the State (except in Mahabubnagar) during this period. Deficiency in rainfall in current year 2015-16 continued to persist. The State received an average rainfall of 611.2 mm during the South West Monsoon (June - September), as against the normal rainfall of 713.6 mm resulting a deficiency of (-)14%.*
- The Government has declared 231 Mandals as drought effected.*

### **AREA**

- The Gross Area Sown in the State during 2015-16 is 48.93 Lakh Hectares as against 53.15 Lakh Hectares in 2014-15, showing a decrease of 7.94 % over previous year.*
- Out of 48.93 lakh hectares of total cropped area 26.18 lakh hectares ( 53.49 %) was under food crops.*
- The area under Non-Food crops was 22.75 lakh hectares.*
- The Net Area Sown in the State during the year 2015-16 is 41.74 Lakh Hectares as against 43.77 Lakh Hectares in 2014-15, showing a decrease of 4.62 % over previous year.*
- Food grains area in the State is 21.80 lakh hectares in 2015-16 as against 26.13 lakh hectares in 2014-15 showing a decrease of 16.57%.*

- Rice Area in the State is 10.46 Lakh Hectares, which is lower by 3.69 Lakh Hectares when compare to 14.15 Lakh Hectares in the previous year.
- Maize Area is 5.73 lakh Hectares is lower when compare to the previous year Area of 6.92 lakh Hectares during 2014-15.
- Rice and Maize are the Main food grain crops which together accounted for 74.26 % of the total area under food grain crops during 2015-16.
- Pulses Area is 4.72 lakh Hectares is higher by 0.64 lakh Hectares over last year Area levels.
- Sugarcane Area is 0.35 lakh Hectares is lower by 0.03 lakh Hectares to that of the last year Area.
- Cotton Area is 17.73 lakh Hectares recorded an increase of 0.80 lakh Hectares over the previous year.

## **PRODUCTION**

### **Food-grains Production**

The total food grains production in the State is 51.45 lakh tonnes in 2015-16 as against 72.18 lakh tonnes in 2014-15 showing a decrease of 28.72 percent over previous year . The decrease is being attributed to significant decrease in rabi food grain production during 2015-16 due to drought conditions, insufficient rains and inadequate water in irrigation sources during 2015-16 over 2014-15.

#### **Kharif Food-grain Production**

The production of food grains during Kharif season 2015-16 was 35.75 lakh tonnes as against 44.72 lakh tonnes in 2014-15, showing a decrease of 20.06 percent. The production is decreased in all the districts in the State during Kharif 2015-16 over previous year.

#### **Rabi Food-grains Production**

The production of Rabi food grains was 15.70 lakh tonnes in 2015-16 as against the 27.46 lakh tonnes in 2014-15, showing a decrease of 42.73 percent. The Production is decreased in all the districts in the State during Rabi 2015-16 due to lack of water in irrigation sources.

### **Production of other Principal crops**

- Oil Seeds production during 2015-16 was 5.79 Lakh Tonnes as against 7.22 Lakh Tonnes during 2014-15 registering a decrease of 19.81%.
- Rice Production in the State is estimated at 30.47 Lakh Tonnes, which is lower by 14.98 Lakh Tonnes when compare to the last year's production of 45.45 Lakh Tonnes.
- Maize Production is estimated as 17.51 lakh tonnes lower than the previous year production of 23.08 lakh tonnes during 2014-15.
- Rice and Maize are the Main food grain crops which together accounted for 93.25% of the total Production under food grain crops during 2015-16.
- Pulses Production is estimated as 2.47 lakh tonnes is lower by 0.15 lakh tonnes over the previous year.
- Sugarcane production is estimated as 24.05 lakh tonnes is lower by 9.38 lakh tonnes to that of the last year production.
- Cotton production is estimated as 37.33 lakh bales (of 170 kg each) registered an increase of 1.50 lakh bales over the previous year cotton production .

### **IRRIGATION**

- The net area irrigated for the year 2015-16 is also decreased to 14.86 lakh hectares from 17.26 lakh hectares in 2014-15, the decrease being 13.90 % .
- The Gross Area irrigated by all sources during the year 2015-16 is 20.28 lakh hectares. This accounted for 41.44% of the gross cropped area as against 47.58% during 2014-15 , 50.12 % was accounted by Rice alone and followed by 8.93 % for Maize , 10.11 % for Cotton, 5.82 % for Groundnut respectively and the remaining irrigated area was covered by other crops.
- Total food crops area under irrigation was 80.31 % and non-food crops area was 19.69 %.

### **CROPPING INTENSITY :**

- The cropping intensity for the year 2015-16 was decreased to 1.17 from 1.21 in 2014-15, showing a decrease of 3.31% over previous year.

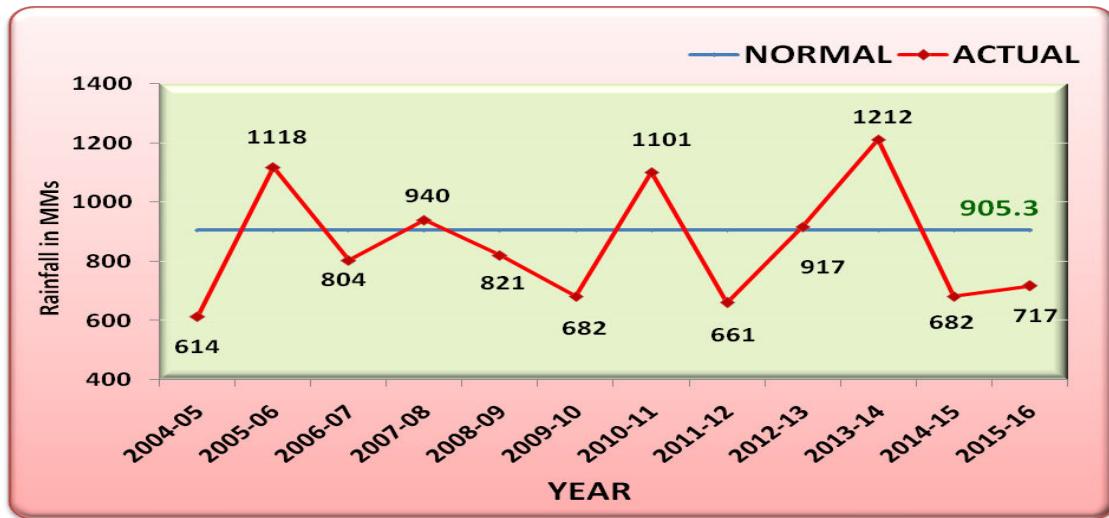

### **IRRIGATION INTENSITY :**

- The irrigation intensity for the year 2015-16 was decreased to 1.36 from 1.47 in 2014-15, showing a decrease of 7.48% over previous year.

## RAINFALL STATISTICS

Annual normal rainfall of Telangana state is 905.3mm as against India's Normal rainfall of 1083 mm. About 80 percent of the total rainfall in the State is being received during South-West monsoon (June-September). The rainfall in the State is erratic and uncertain and distribution of the rainfall is uneven in various mandals thus, making agriculture a proverbial gamble with the monsoons.

Year wise details of Actual and Normal rainfall are depicted in the following Graph.

On observing the rainfall pattern during the period from 2004-05 to 2015-16 In the above Table it reveals that

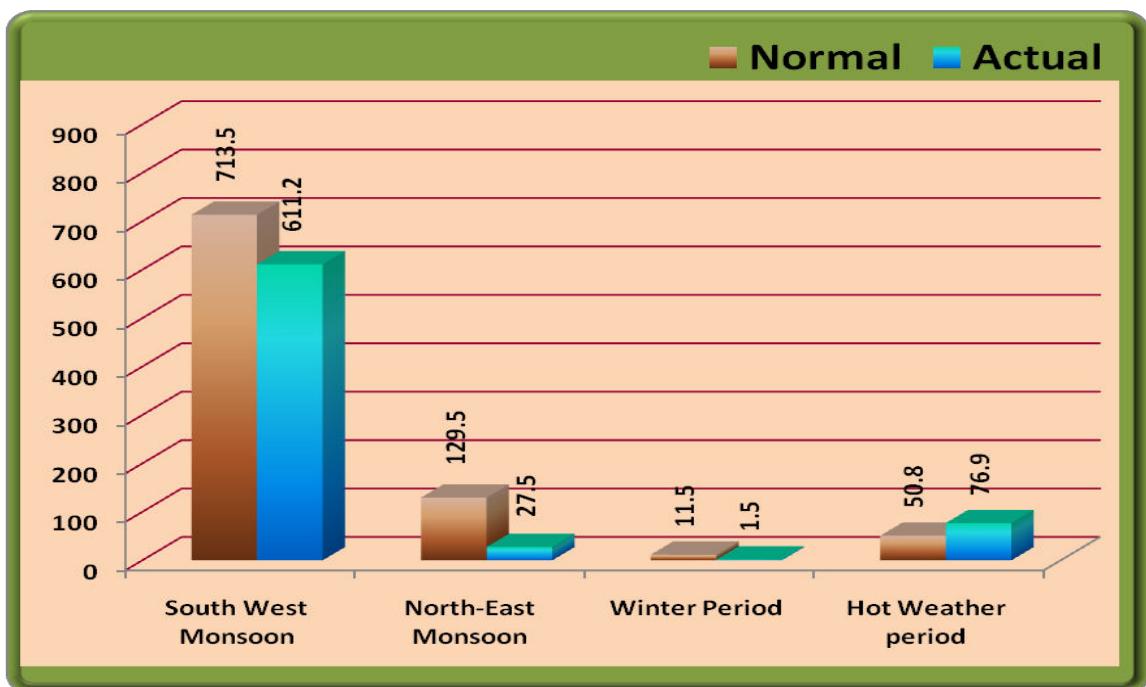

- 614 mm annual rainfall registered in 2004-05 was lowest.
- 1212 mm annual rainfall received in 2013-14 was the highest.

### RAINFALL AND SEASONAL CONDITIONS.

The seasonal conditions during the year 2015-16 was adversely affected due to inadequate rains, State received 717.1 mms as against normal rainfall of 905.3 mms which shows deficit of 20.8 % over normal rainfall. During the south west monsoon period State received average rainfall of 611.2 mm as against normal rainfall of 713.5 mm, which shows deficit of 14.3 % over normal rainfall. In North-East monsoon period also rainfall was deficit by 78.8 percent over normal rainfall. However Deficient (87.0 %) rainfall received during Winter period and regarding Hot weather period Rainfall received was excess of 33.9 % when compared to normal rainfall.

### SEASON WISE RAINFALL

Sl. No.	Season	Normal	Actual	% dev.	Status
(1)	(2)	(3)	(4)	(5)	(6)
1	South West Monsoon	713.5	611.2	-14.3	Deficient
2	North-East Monsoon (October)	129.5	27.5	-78.8	Deficient
3	Winter Period	11.5	1.5	-87.0	Deficient
4	Hot Weather period	50.8	76.9	33.9	Excess
<b>Grand Total</b>		905.3	717.1	-20.8	Deficient

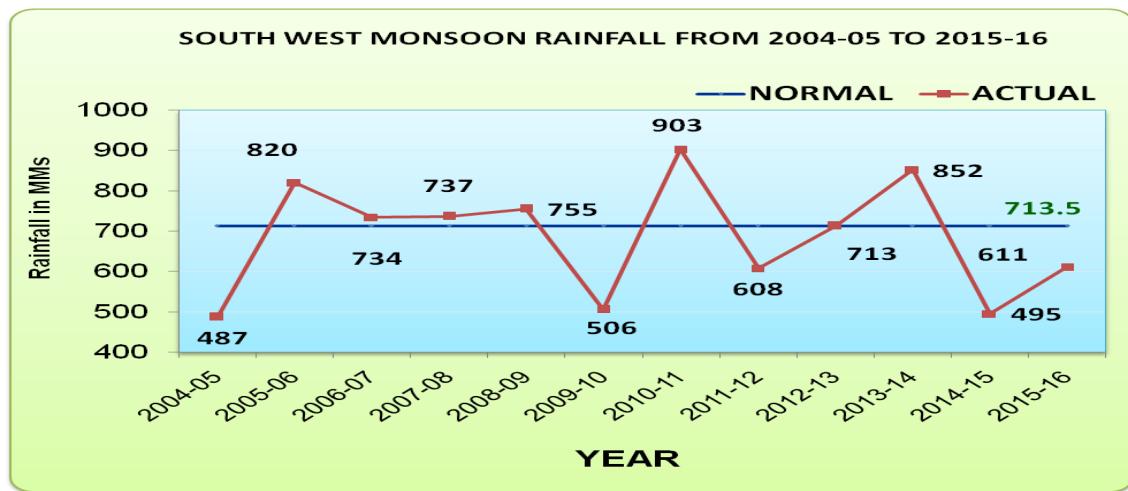

#### **SOUTH-WEST MONSOON: (June - September 2015)**

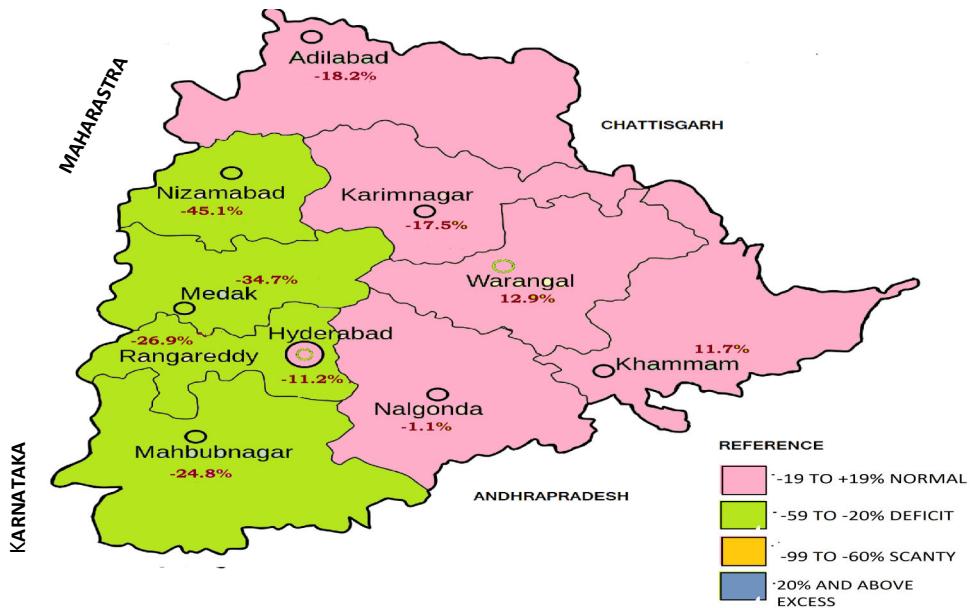

There has been an acute deficiency of rainfall in previous two years, i.e., 2014-15 and 2015-16. The actual rainfall received during South-West monsoon of 2014-15 was 494.7 mm as against the normal rainfall of 713.6 mm, recording a deficit of -31%. There was a deficit in rainfall in nine out of ten districts in the State (except in Mahabubnagar) during this period. Deficiency in rainfall in current year 2015-16 continued to persist. The State received an average rainfall of 611.2 mm during the South West Monsoon (June - September), as against the normal rainfall of 713.6 mm resulting a deficiency of -14%.

Sl.No.	Month	Normal	Actual	% of Dev.
1	June	127.6	220.3	73
2	July	238.0	80.3	-66
3	August	218.7	151.2	-31
4	September	129.2	159.4	23
	Total	713.5	611.2	-14

On analyzing District wise rainfall data received during South West Monsoon in the State revealed that Adilabad, Khammam and Warangal, Karimnagar, Nalgonda and Hyderabad Districts had normal rainfall.

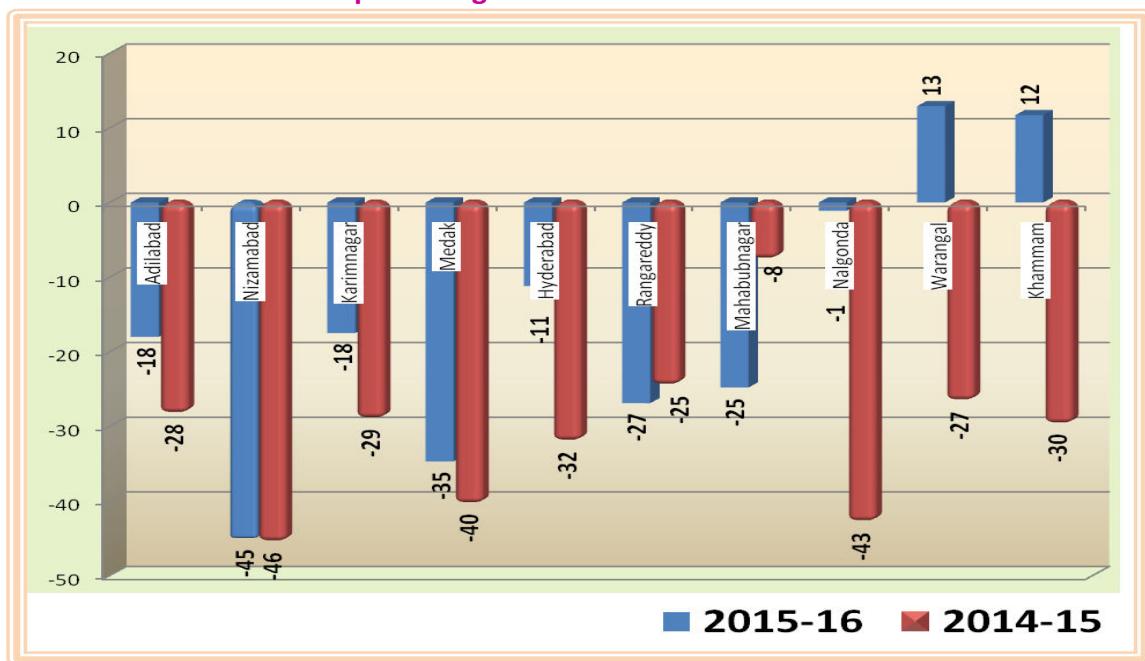

#### SOUTH WEST MONSOON 2015-16 (JUNE - SEPTEMBER)

**District wise South-West Monsoon**

Sl.No.	District	Cumulative Rainfall					
		During the Year 2015-16			Corr. period of Previous Year		
		Normal	Actual	% of Dev.	Normal	Actual	% of Dev
1	2	3	4	5	6	7	8
1	Adilabad	984.2	805.2	-18.2	984.2	705.3	-28.3
2	Nizamabad	849.1	466.0	-45.1	849.1	462.9	-45.5
3	Karimnagar	794.6	655.5	-17.5	794.6	564.3	-29.0
4	Medak	675.8	441.2	-34.7	675.8	403.1	-40.4
5	Hyderabad	562.1	499.2	-11.2	562.1	381.8	-32.0
6	Rangareddy	587.7	429.7	-26.9	587.7	443.8	-24.5
7	Mahabubnagar	446.6	335.8	-24.8	446.6	412.6	-7.6
8	Nalgonda	561.7	555.7	-1.1	561.7	321.4	-42.8
9	Warangal	799.1	901.9	12.9	799.1	586.3	-26.6
10	Khammam	875.0	977.2	11.7	875.0	614.8	-29.7
<b>STATE AVERAGE</b>		<b>713.6</b>	<b>611.2</b>	<b>-14.3</b>	<b>713.6</b>	<b>494.7</b>	<b>-30.7</b>

**District wise percentage deviation for 2015-16 and 2014-15**

### **Deficiency in Rainfall:**

Deficiency in rainfall during 2014-15 and 2015-16 aggravated the drought conditions in the State hindering the growth of State's economy, in general and agriculture, in particular. Further analysis shows that 9 Mandals in the State has experienced more than 60 percent deficiency and about 45 percent of Mandals in the State have more than 20 percent deficiency in rainfall during South-West monsoon. District wise analysis shows that significant number of Mandals in the districts of Mahabubnagar, Nizamabad and Medak received deficient rainfall.

#### **District Wise Status of Rainfall - South West Monsoon**

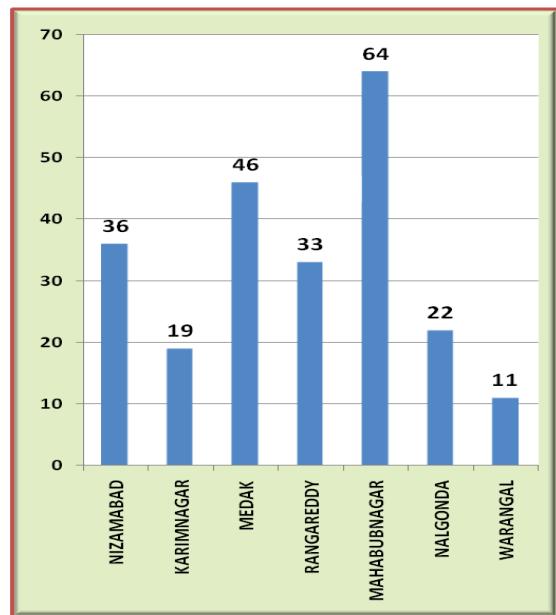

Sl.No	District Name	No.of Mandals	No.of Mandals				Excess >19%
			No Rain 100%	Scanty	Deficient	Normal	
				-99 to -60%	-59 to -20%	-19 to 19%	
1	ADILABAD	52	-	-	21	31	-
2	NIZAMABAD	36	-	1	34	1	-

9	WARANGAL	51	-	-	2	34	15
10	KHAMMAM	41	-	-	3	27	11
<b>STATE TOTAL</b>		<b>459</b>	<b>-</b>	<b>9</b>	<b>209</b>	<b>194</b>	<b>47</b>

## Adverse Seasonal conditions :

The State constituted a Committee to identify the drought affected Mandals by considering the norms of rainfall deficiency, reduction in yield, area, dry spells, in addition to the Central government norms of Normalized Vegetation Difference Index (NDVI) and Moisture Adequacy Index (MAI), and the Committee recommended for declaration of 231 Mandals as drought affected Mandals during Kharif, 2015. District wise drought affected Mandals are shown in Table.

### District wise Drought Affected Mandals during Kharif-2015

Sl.No	District Name	No. of Mandals
1	NIZAMABAD	36
2	KARIMNAGAR	19
3	MEDAK	46
4	RANGAREDDY	33
5	MAHABUBNAGAR	64
6	NALGONDA	22
7	WARANGAL	11
STATE TOTAL		231

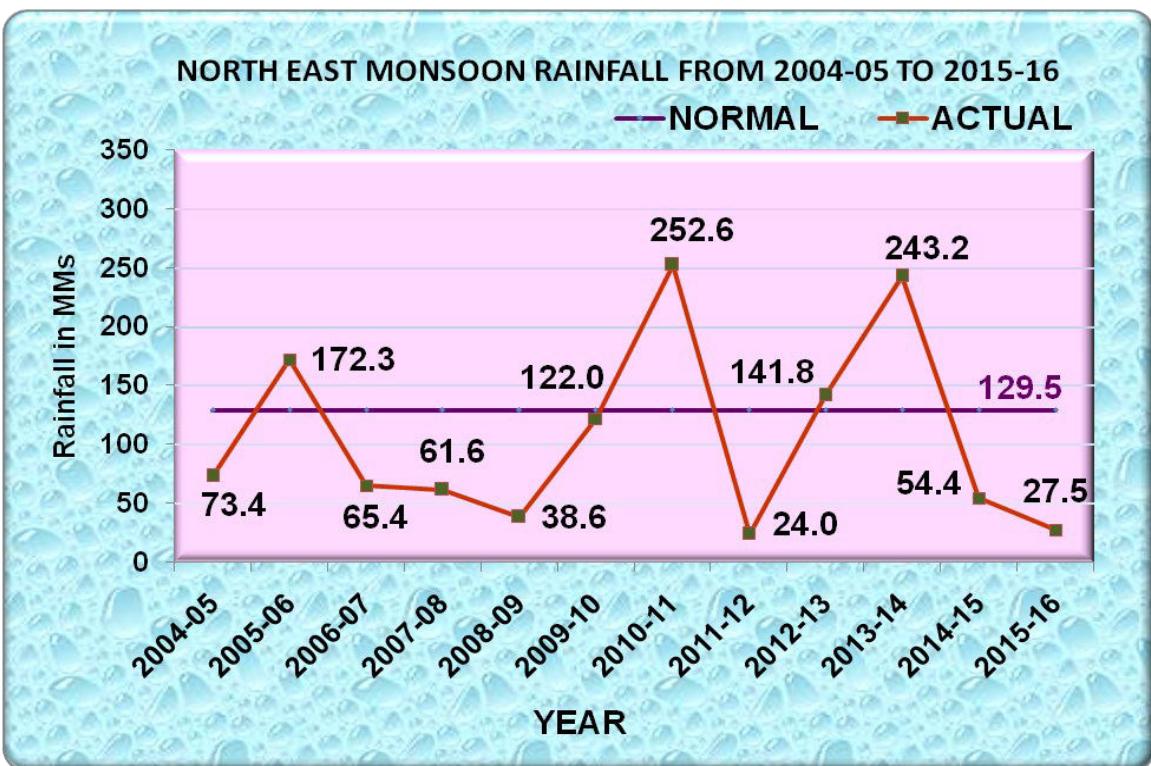

### NORTH EAST MONSOON, 2015-16 (October-December 2015)

During the North-East Monsoon season, State recorded an average rainfall of 27.5 mm. with deficit of 78.8%, when compared to the normal rainfall of 129.5 mm., all districts recorded deficit Rainfall . All Districts have recorded scanty rainfall in the State.

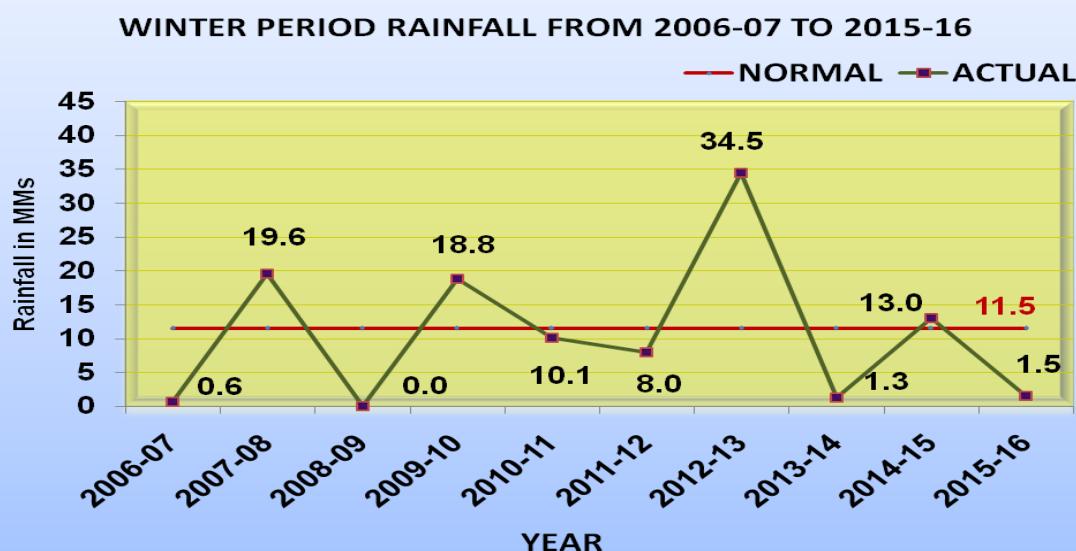

#### THE MONTH WISE RAINFALL DURING NORTH EAST MONSOON 2015-16

Sl.No	Month	Normal	Actual	% of Deviation
1	October'15	98.7	24.5	-75
2	November'15	25.3	2.1	-92
3	December'15	5.5	0.9	-84
<b>Total</b>		129.5	27.5	-79

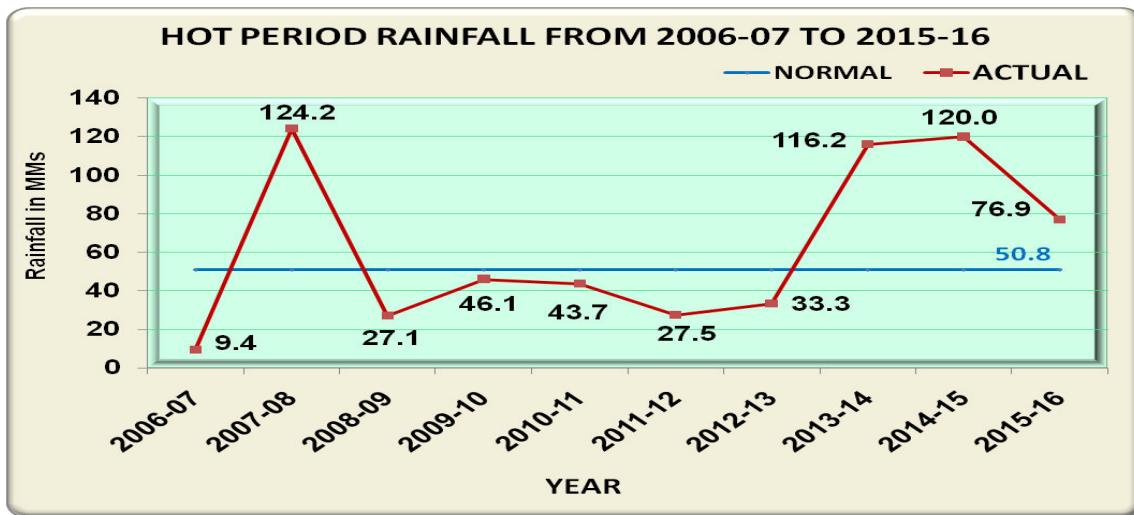

### WINTER PERIOD-2015-16 (January- February)

During the Winter Season, State recorded an average rainfall of 1.5 mm. Deficit by 87% when compared to the normal rainfall of 11.5 mm., during the season all districts recorded scanty rainfall.

### HOT WEATHER PERIOD-2015-16 ( March-May )

During the Hot-Weather season, State recorded an average rainfall of 76.9 mm. with excess rainfall of 136.2%. When compared to the normal rainfall of 50.8 mm . The comparison of rainfall recorded during the Hot-Weather season with the normal rainfall shows that the rainfall received was received "Excess" in 9 districts and" Normal" in Khammam District.

## **2 . LAND UTILIZATION**

Out of The total Geographical area of 112.08 lakh hectares & stood 12th Position in India. The area under forest cover is 25.40 lakh hectares, constituting 22.66 % of the geographic area. The proportion of area under forest was lower than the ideal ratio of one third of total geographical area, about 37.25 percent area is under cultivation (41.75 lakh hectares), 14.09 percent area is under current fallow lands (15.79 lakh hectares), 7.96 percent Land is put to non-agricultural uses (8.92 lakh hectares), 5.42 percent is barren and uncultivable (6.07 lakh hectares), 7.33 percent falls under other fallows (8.22 lakh hectares) and the remaining 5.93 lakh hectares is under culturable waste, permanent pastures and land under miscellaneous tree crops and groves, Which together accounts for 5.29 % of total geographical area of the state.

**THE PATTERN OF LAND USE UNDER VARIOUS CATEGORIES ARE GIVEN BELOW**

Sl. No	Category	Area in Lakh hectares			
		2015-16		2014-15	
		AREA	% to Geographical Area	AREA	% to Geographical Area
<b>1</b>	Total Geographical Area	112.08	100.00	112.08	100.00
<b>2</b>	Forest	25.40	22.66	25.40	22.66
<b>3</b>	Barren and Uncultivable Land	6.07	5.42	6.07	5.42
<b>4</b>	Land Put to Non-Agri. Uses	8.92	7.96	8.85	7.90
<b>5</b>	Culturable Waste	1.82	1.62	1.82	1.62
<b>6</b>	Permanent Pastures and Other Grazing Lands	2.99	2.67	2.99	2.67
<b>7</b>	Land under Misc. Tree crops, Groves not included in Net Area Sown	1.12	1.00	1.12	1.00
<b>8</b>	Other Fallow Lands	8.22	7.33	8.05	7.18
<b>9</b>	Current Fallow Lands	15.79	14.09	14.01	12.50
<b>10</b>	Net Area Sown*(including Fish Culture)	41.75	37.25	43.77	39.05

- The land use pattern reveals that the net sown area stood 41.75 lakh hectares (37.25 %) of State's total geographical area of 112.08 lakh hectares and lower than that of 43.77 lakh hectares (39.05 %) during 2014-15.

### DISTRICT WISE ANALYSIS :

Among 10 districts of Telangana, Mahabubnagar, with 9.03 lakh hectares of land stand largest in terms of Gross Cropped Area in 2015-16, followed by Nalgonda and Adilabad with 6.69 lakh and 6.28 lakh hectares respectively.

- Cereals, Millets and pulses occupy more than 50 percent of total GCA in Medak, Rangareddy, Nizamabad and Karimnagar districts.
- Nalgonda (with 32 percent GCA) and Karimnagar districts (with 32 percent GCA) stand at the top in terms of area and production of rice in the state.
- With 1.92 lakh hectares area under coarse cereals, Mahabubnagar stands first in terms of area under coarse cereals .
- Karimnagar district stand first in terms of production of coarse cereals with 3.77 lakh tonnes.
- Cotton is a major non-food crop in Nalgonda, Adilabad, Mahabubnagar, Warangal, karimnagar and Khammam districts.

## 2.1 PATTERN OF LAND UTILISATION FROM 2008-09 TO 2015-16

(Area in Lakh Hectares )

YEAR	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16
<b>Forest</b>	27.43	27.43	27.43	27.43	27.43	25.40	25.40	25.40
Barren and Uncultivable Land	6.26	6.18	6.17	6.17	6.17	6.07	6.07	6.07
Land Put to Non-Agricultural Uses	8.19	8.24	8.71	8.82	8.86	8.81	8.85	8.92

Permanent Pastures and Other Grazing Lands	3.09	3.08	3.03	3.02	3.02	3.00	2.99	2.99
Land under Misc. Tree crops, Groves not included in Net Area Sown	1.16	1.16	1.14	1.14	1.14	1.12	1.12	1.12
Other Fallow Lands	7.88	8.08	7.80	8.26	7.91	7.17	8.05	8.22
Current Fallow Lands	16.79	19.38	13.97	12.36	12.03	9.51	14.01	15.79
<b>Net Area Sown</b>	42.33	39.59	44.92	45.99	46.54	49.23	43.77	41.75
<b>Geographical Area</b>	114.84	114.84	114.84	114.84	114.84	112.08	112.08	112.08

*Note: Difference in Geographical areas is due to transfer of certain villages of Khammam District to residual Andhra Pradesh.*

## Distribution of Land Use:

### Forests

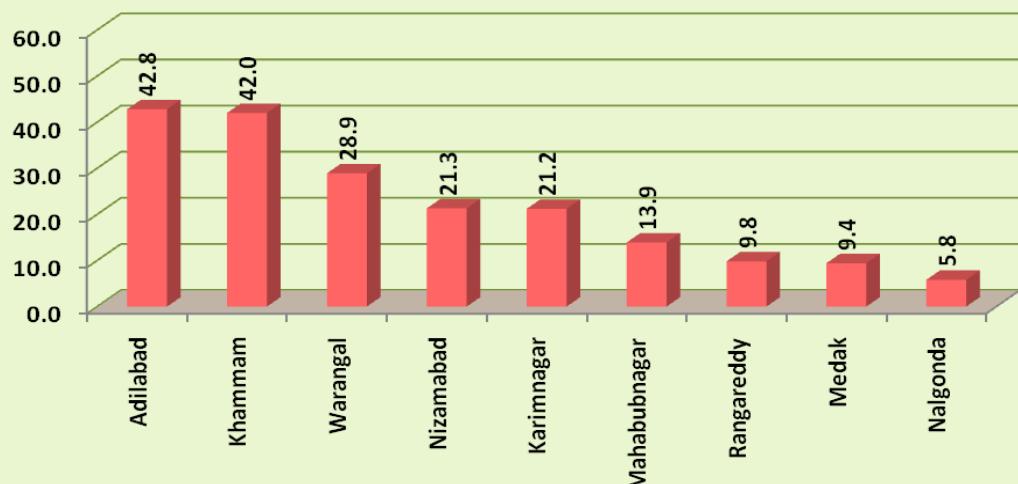

Forest cover means all lands, one hectare and more in area, with a tree canopy density of 10 percent or more irrespective of ownership and legal status. Such lands may not necessarily be a recorded forest area. It also includes orchards, bamboo and palm. India's National Forest Policy 1988 aims at maintaining 33 percent country's geographical area under forest and tree cover.

The Forest area of the State during 2015-16 is 25.40 lakh hectares accounting for 22.66 percent of the total geographical area in the State. Khammam, Adilabad and Warangal districts have proportionally more area under forests and these districts together accounted to nearly 63.67 percent of the total forest area in the State during 2015-16.

Forestry and logging contribution to State GSDP at current prices is 0.5% and 3.13% in Agriculture and allied sector GVA for the year 2014-15. The core objective of forests is to enhance green cover by integrating it with livelihood.

As per the forest department out of total Geographical area of the Telangana State is 1,12,077 sq.kms., 27,292 sq.kms., area is under forest, which accounts for 24.35% of total geographical area, which is including Social forestry. Out of that area, Reserved Forest area is 19,696 sq.kms., Protected Forest forms 6,953 sq.kms., and the rest of 642 sq.kms., are unclassified. District wise Percentage of Forest area to geographical area during 2015-16 is depicted in the following graph.

**PERCENTAGE OF FOREST AREA TO GEOGRAPHICAL AREA DURING 2015-16**

#### **Land Put to Non - Agricultural Uses:**

This includes all lands occupied by buildings, Roads, Factories and Railways and under water lands i.e. rivers, canals and other lands which put to uses other than agriculture. The area under this category is 8.92 lakh hectares accounting for 7.96 percent of the total geographical area in the state during 2015-16 as against 8.85 lakh hectares in 2014-15, recording an increase of 0.79 percent over previous year. The land put to Non Agricultural uses is further bifurcated into following 4 sub groups (i) Water Logged Area (0.06 Lakh hectares), (ii) Social Forestry (0.07 lakh hectares) (iii) Land Under Still Water (2.45 lakh hectares) and (iv) Others (6.34 lakh hectares).

#### **Barren and Uncultivable Land:**

This covers all barren and uncultivable land like mountains, deserts, etc., Land which cannot be brought under cultivation unless at a high cost shall be classified as barren and uncultivable, whether such land is in isolated blocks or within cultivated holdings. An extent of 6.07 lakh hectares of land comes under barren and uncultivable land which represents 5.42 percent of the total geographical area in the State.

#### **Permanent Pastures and Other Grazing Lands:**

Permanent Pastures and Other Grazing Lands covers all grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands under the head common grazing lands shall be included under this category. An extent of 2.99 lakh hectares of land comes under permanent pastures and other grazing lands which accounts for 2.67 percent of the Total Geographical area in the State.

#### **Miscellaneous Tree Crops and Groves not included in the Net Area Sown:**

It includes all cultivable land which is not included under net area sown but is put to some agricultural use. Lands under , thatching grass, and other groves for fuel etc. which are not included under orchards shall be included under this category. Total land under this category was 1.12 lakh hectares accounts for 1.00 percent of the total Geographical area in the State.

#### **Culturable Waste:**

This include all lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and also in last five years or more in succession for one season in a year i.e., land which kept fallow for more than 5 years classified as culturable waste. It formed 1.62 percent of the total Geographical area in the state during 2015-16. The area under culturable waste in 2015-16 was 1.82 lakh hectares.

### **Other Fallow Lands:**

This implies all lands, which were taken up for cultivation but are temporarily out of cultivation for a period not less than a year and not more than five years. An extent of 8.22 lakh hectares which accounts for 7.33 percent of the total geographical area was reported under this category.

The area under other fallow lands was 8.22 lakh hectares during 2015-16 as against 8.05 lakh hectares in 2014-15. showing an increase of 2.11 percent over previous year.

### **Current Fallows:**

This class comprises areas, which are kept fallow during the current year only. If any, cultivated area is not cropped in the current year, it may be treated as current fallow. The area under current fallow during 2015-16 was 15.79 lakh hectares as against 14.01 lakh hectares in 2014-15 showing an increase of 12.63 percent over previous year, this increase may be attributed to adverse seasonal conditions and insufficient water in Irrigation sources.

## **LAND USE PARTICULARS**

**CROPPING PATTERN:** It refers to the proportionate area under different crops during agricultural year. The gross cropped area under all crops has decreased to 48.93 lakh hectares in 2015-16 from 53.15 Lakh hectares in 2014-15. While the area under Food crops accounted for 53.47 % and that of non-food crops formed 46.53 % only, of the gross cropped area during the year under report.

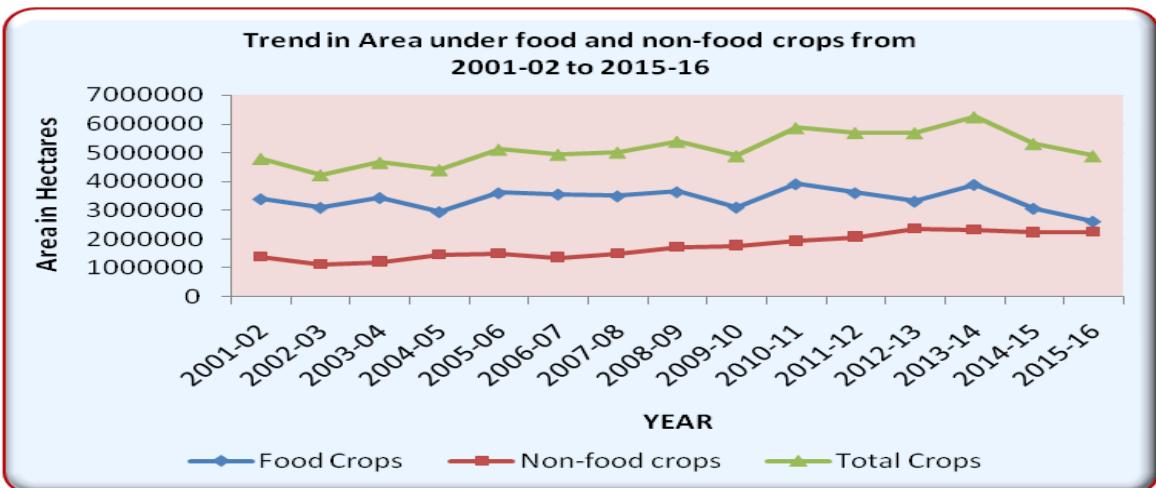

**CHANGES IN CROPPING PATTERN IN TELANGANA:** Food crops consisting of cereals, coarse cereals, pulses, and other food crops occupy lions share in total cropped area in the State. Research studies on State's cropping pattern reveals that more than one-third area was under food crops during 1980s. Cropping pattern from 1980s onward shifted to non-food crops in the State.

Of the total cropped area of 48.01 lakh hectares in 2001-02, around 71 percent was under food crops and 29 percent was under non-food crops. However, the share of food crops came down to 53 percent and the share of non-food crop to 47 percent during the year 2015-16. Even in absolute terms area under food crops came down from 33.99 lakh hectares in 2001-02 to 26.18 lakh hectares in 2015-16 . This indicates that area under food crops is decreasing in both absolute and relative terms and cropping pattern is shifting towards non-food crops.

### **AREA UNDER FOOD AND NON-FOOD CROPS FROM 2001-02 TO 2015-16**

( Area in Hectares )

Sno	Year	Food Crops	%	Non-food crops	%	Total

15	2015-16	2617594	53	2275554	47	4893148

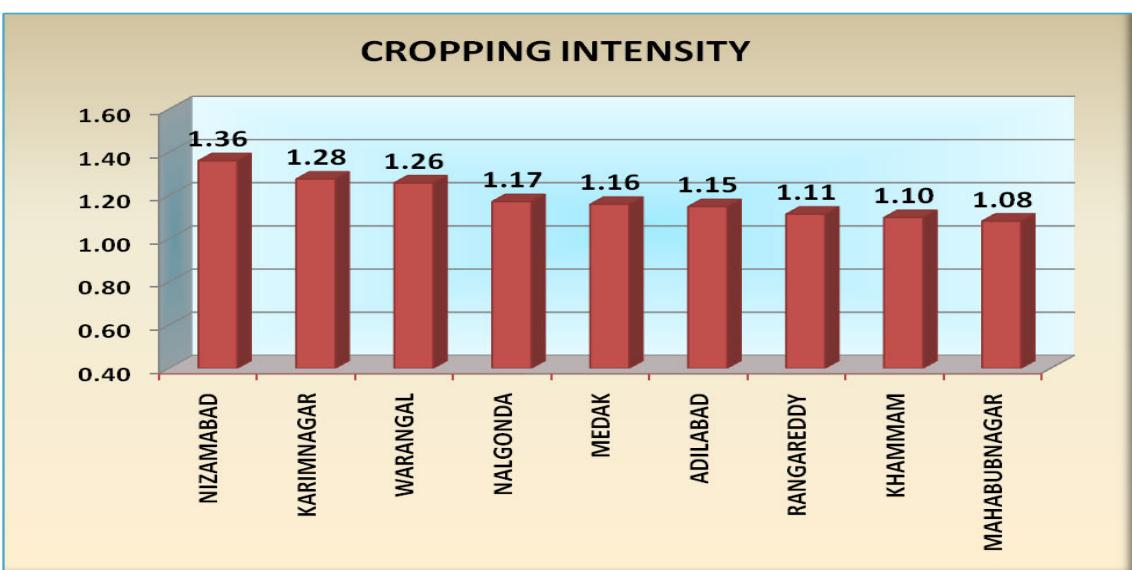

#### CROPPING INTENSITY:

The cropping intensity (the ratio of gross cropped area to net cropped area) is one of the indicators for assessing efficiency of agriculture sector. The cropping intensity for the year 2015-16 decreased to 1.17 from 1.21 in 2014-15, showing a decrease of 3.31 % over previous year. The level of cropping intensity moves in consonance with the behavior of the monsoon and availability of water for irrigation .

- The cropping intensity is highest in Nizamabad District (1.36) and lowest in Mahabubnagar district (1.08).

#### DISTRICT WISE CROPPING INTENSITY IN 2015-16

### **3.GROUNDWATER**

Ground water Department , Government of Telangana is monitoring the changes in ground water regime continuously through a network of Piezometer wells. The water levels are recorded and the fluctuations noticed seasonally and annually are analyzed in relation to rainfall, recharge measures, drought and extraction of ground water in the area.

The average groundwater level for the State in the month of May-2016 is 15.62 m, where as it was 13.27m during the same period in the previous year. The deep water levels during May-2016 when compared to the last year water levels is due to deficit rainfall received during 2014-15 and 2015-16 resulting in a net fall of 2.35m during this year.

When the average ground water levels of May-2015 with May-2016, are compared a fall in average water levels is observed in all the districts in the entire state except in Hyderabad. The fall in water levels is observed in the range from 0.54 to 5.47m. The highest fall in average water levels is observed in Medak district.

**Fall in Water levels:-** The water level fluctuation during May-16 in comparison with May-15 water levels indicates fall in 332 mandals in the state, Medak (41), Nizamabad (32), Mahabubnagar(52), Rangareddy(29), Karimnagar(52), Nalgonda(41), Adilabad(32) and Warangal(33) and Khammam(18) .

### Depth of Water Level

#### **4. Landholding Pattern in Telangana**

Land resource is a vital input for agriculture. Average landholding in Telangana in 2010-11 was 1.12 hectares (2.8 acres) as against the all India average of 1.16 hectares. Increase in population has put pressure, leading to fragmentation of landholdings. As shown in the Table , the share of marginal and small landholdings constitute about 86 percent of total landholdings in Telangana State in 2010-11, while their share in total area was around 55 percent. About 14 percent of total landholdings in the State were medium, ranging between 2 to 10 hectares, whereas their share in total area was 40.5 percent.

- District wise analysis shows that average landholding size was less than one hectare in Nizamabad, Karimnagar, and Medak districts showing skewed land distribution in the State.
- % area held by semi medium and small holdings is higher than marginal holdings.
- More than 60% holdings are marginal in Nizamabad, Karimnagar, Medak, Khammam and Warangal districts.
- Average size of land holding is highest (1.40 ha.) for Adilabad District and lowest (0.92 ha.) for Nizamabad District.

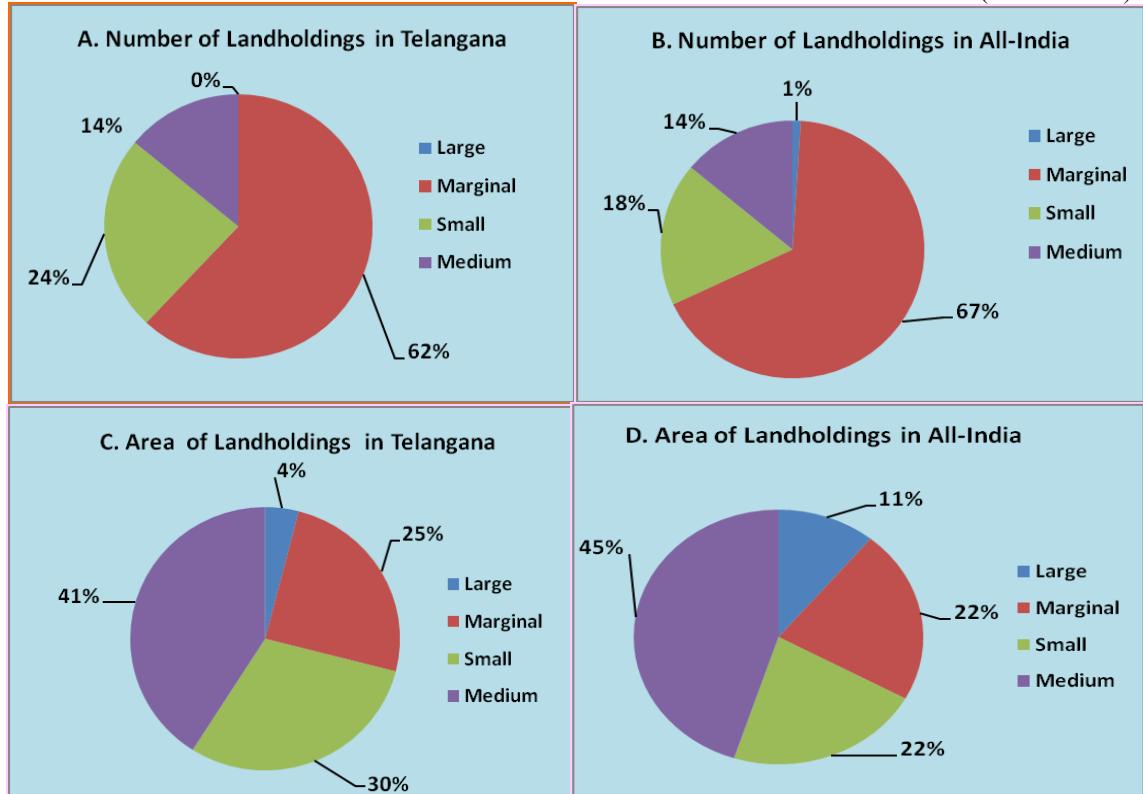

#### **PERCENTAGE DISTRIBUTION OF HOLDINGS AND AREA BY SIZE OF HOLDINGS: 2010-11**

Sl. No	District Name	Holdings					Area					Aver- age Size of Hold- ing (Ha)
		Marginal	Small	Medium	Semi Medium	Medium	Large	Marginal	Small	Medium	Semi Medium	Medium
1	ADILABAD	49.8	27.7	17.5	4.6	0.4	16.9	28.3	31.9	18.1	4.8	1.40
2	NIZAMABAD	67.5	23.8	7.3	1.3	0.1	33.9	36.1	20.6	7.9	1.5	0.92
3	KARIMNAGAR	67.5	21.9	8.4	2.0	0.2	30.9	31.8	22.9	11.8	2.6	0.96
4	MEDAK	67.9	21.7	7.8	2.3	0.3	29.9	31.3	21.2	13.2	4.4	0.97
5	RANGAREDDY	58.3	25.7	12.1	3.5	0.4	23.5	29.4	26.1	15.8	5.2	1.22
6	MAHABUBNAGAR	57.9	25.4	12.6	3.7	0.4	22.0	29.5	27.2	16.8	4.5	1.23
7	NALGONDA	58.8	25.3	12.1	3.5	0.3	23.1	29.9	26.9	16.5	3.6	1.19
8	WARANGAL	67.1	21.4	8.7	2.5	0.3	28.6	29.7	22.8	14.2	4.7	1.01
9	KHAMMAM	62.2	22.6	11.6	3.3	0.3	25.6	27.6	26.7	15.8	4.3	1.14
	TOTAL	62.0	23.9	10.9	3.0	0.3	25.3	30.2	25.5	15.0	4.0	1.12

As compared with all India landholding pattern in Telangana is more evenly distributed. While 85 percent of total landholdings at all-India are marginal and small landholdings, farmers possess only 44 percent of total area of land holdings as against, 86 percent of total landholdings in Telangana are marginal and small possessing 55 percent of total area of landholdings.

### **Percentage distribution of landholdings and area in Telangana 2010-11**

( In Hectares )

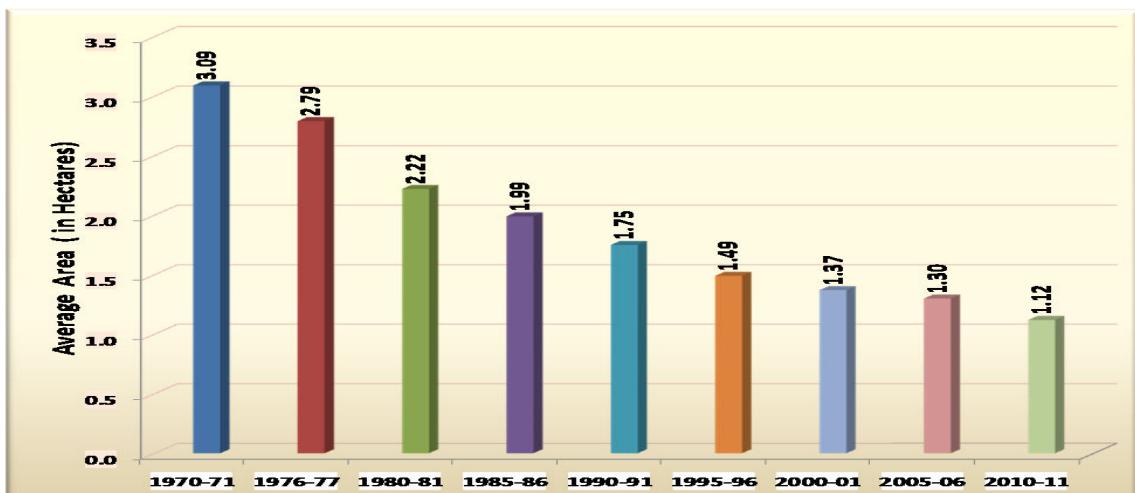

### **AVERAGE SIZE OF THE OPERATIONAL HOLDINGS ( ALL HOLDINGS )**

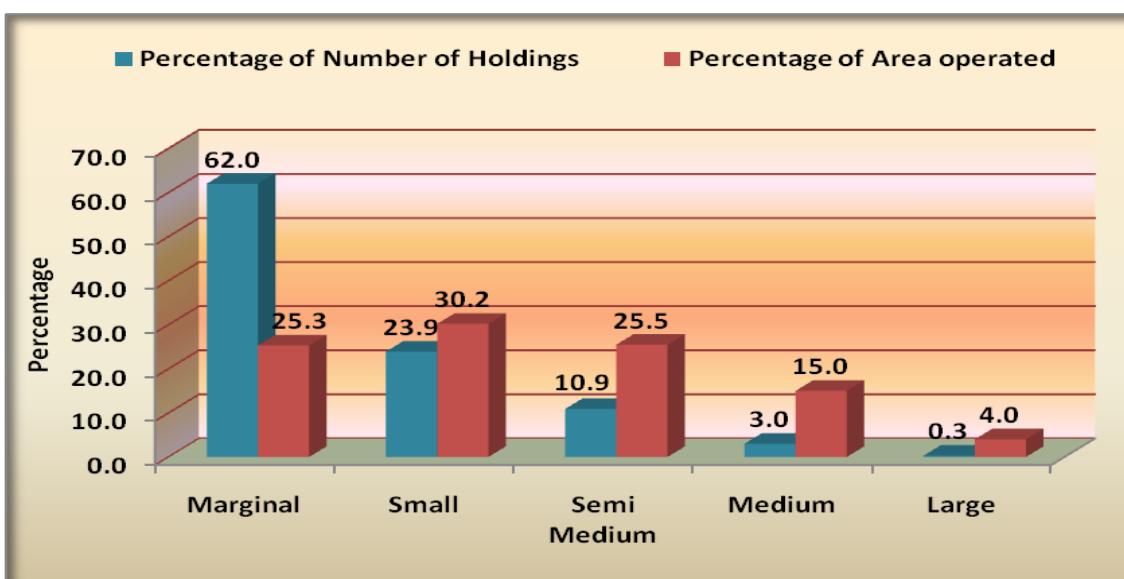

The average size of holdings in the State was 1.30 hectares in 2005-06 and it declined to 1.12 hectares in 2010-11, which shows a decline of 14.49 percent. The decrease in the average size of holdings is observed in all categories except marginal and small groups.

At all India the average size of operational holding in Agriculture Census 2010-11 was 1.15 hectares against 1.23 hectares in 2005-06. The average size relating to male and female operational holdings in 2010-11 was 1.18 hectares and 0.93 hectare against 1.25 hectares and 0.98 hectares respectively in 2005-06. The average operated area in "all size-classes" had thus decreased in general in 2010-11 as compared to 2005-06.

Size Group	Average Size		Percentage Variation of 2010-11 over 2005-06
	2005-06	2010-11	
Marginal	0.46	0.46	0.00
Small	1.41	1.41	0.00
Semi-medium	2.67	2.63	-1.51
Medium	5.67	5.54	-2.21
Large	15.90	15.56	-2.12
All Size Groups	1.30	1.12	-14.49

**DISTRIBUTION OF LAND HOLDINGS AND AREA OPERATED ACCORDING TO SIZE CLASSES IS GIVEN IN THE GRAPH BELOW:**

## **5. AGRO CLIMATIC ZONES**

Based on the distribution of Rainfall and Soils, the state has been divided into 4 Agro-climatic zones i.e., 1) Northern Telangana Zone 2) Central Telangana Zone 3) Southern Telangana Zone and 4) High Altitude & Tribal Zone

**1. Northern Telangana zone:** - This zone includes the districts of Adilabad, Karimnagar and Nizamabad. The annual normal rainfall is 900 mm to 1150 mm mostly from south west monsoon. The maximum and minimum temperatures during south west monsoon range from 21 °C to 25 °C and 32 °C to 37 °C respectively. Red soils are predominant in the zone which includes chalkas, red sands and deep red loams. Very deep Black cotton soils are seen in the Zone.

**2. Central Telangana zone:** - This zone includes the districts of Medak, Warangal and Khammam Districts and it receives an annual normal rainfall of 800 mm-1150 mm. The maximum and minimum temperatures during south west monsoon range from 21 °C to 25 °C and 22 °C to 37 °C respectively. Red soils are predominant in the zone which includes chalkas, red sands and deep red loams. very deep black cotton soils are also seen in the zone.

**3. Southern Telangana zone:** - This zone comprises of the districts of Rangareddy, Hyderabad, Mahaboobnagar and Nalgonda. The annual normal rainfall is 600 mm - 780 mm. The maximum and minimum temperatures during south west monsoon range from 28 °C to 34 °C and 22 °C to 23 °C respectively. This zone is a predominantly red soil tract having red with loamy sub-soil i.e., chlakas.

**4. High Altitude and Tribal zone:** - This zone consists of the areas along the Northern and Eastern borders of the state in the districts of Adilabad and Khammam. These areas are inhabited by Tribals. The annual normal rainfall is around 1400mm. The important soils Red sandy loams and Red loams with clay base with very small patches of Alluvial soils. The maximum and minimum temperatures during south west monsoon range from 13 °C to 27 °C and 29 °C to 34 °C and respectively.

Sl. No . .	Name of the zone	Districts	Soil type	Important crops grown	Normal Rain fall (in mm)
1	2	3	4	5	6
1	Northern Telangana Zone	Karimnagar, Nizamabad, Adilabad	Red Earths with loamy sub soils (Chalkas) and black cotton soils.	Rice, Maize, Soyabean, Cotton, Redgram, Turmeric	900-1150
2	Central Telangana Zone	Warangal, Khammam, Medak	Red earths with loamy soils (Chalkas), Red sandy soils and BC soils in pockets.	Cotton, Rice, Maize, Greengram, Mango, Chillies,	800-1150
3	Southern Telangana Zone	Mahabubnagar Nalgonda Rangareddy and Hyderabad	Red soils chalks.	Cotton, Rice, Redgram, Maize, Greengram,	600-780
4	High Altitude & Tribal Areas Zone	High Altitude & Tribal Areas of Adilabad And Khammam.	Red sandy loams and patches of all Aerial soils.	Chillies, Rice Cotton and Horticulture crops.	1400 Around

## **6. AGRICULTURE PRODUCTION SCENARIO-2015-16:**

As per final Estimates for 2015-16, total production of rice in the state is estimated at 30.47 lakh tones, which is lower by 14.98 lakh tones when compare to the last year's production of 45.45 lakh tonnes.

- Production of Maize estimated as 17.51 lakh tonnes is also a lower when compare to the previous year 2014-15 production of 23.08 lakh tonnes . Production of rice as well as Maize is register considerably lower than their average production levels.
- The production of Cereals & Millets is estimated as 48.98 lakh tones is lower by 20.57 lakh tonnes than the last year's production of 69.55 lakh tonnes and also lower than the average production of last five years.
- Total food grains production estimated as 51.45 lakh tonnes is lower by 20.73 lakh tonnes when compare to the last year's production of 72.18 lakh tones.
- Production of pulses and oilseeds estimated as 2.47 lakh tonnes and 5.79 lakh tonnes respectively are lower by 0.16 lakh tonnes and 1.43 lakh tonnes respectively over last year's production levels.
- The current year's production of Sugarcane estimated as 24.05 lakh tonnes is lower by 9.38 lakh tones to that of the last year production. The production of Cotton is estimated as 37.33 lakh bales (of 170 kg each) registered an increase of 1.50 lakh bales over the previous year cotton production . A statement showing crop-wise area and production of foodgrains, oilseeds and commercial crops during the period from 2013-14 to 2015-16 are given in statement.

Crops	Area(Lakh Hectares)			Production(lakh tones)			Yield(kg/hectare)		
	2013-14	2014-15	2015-16	2013-14	2014-15	2015-16	2013-14	2014-15	2015-16

# Production in lakh Bales of 170 Kg each Bale.

### **AREA UNDER FOOD AND NON-FOOD CROPS**

The area brought under food crops during 2015-16 is 26.17 lakh hectares as against 30.68 lakh hectares in 2015-16, showing a decrease of 14.70 % over previous year. The area under non-food crops is increased to 22.76 lakh hectares as against 22.47 lakh hectares in 2014-15, showing an increase of 1.29 %. Due to area increased under Cotton crop.

**TABLE-1**

The area under food grains is decreased to 21.80 lakh hectares during 2015-16 as against 26.13 lakh hectares in 2014-15 the decrease being 16.57 % over previous year area. The reason to decrease in area under foodgrain crops , due to non receipt of sufficient water in irrigation sources and untimely rains. The area and production of food grains in the state for the last five years are shown below.

## **Yield Levels and Yield Gap:**

Productivity (Production in kilogram per hectare of Land) of rice crop is almost stable between the period 2009-10 and 2015-16(chart). It is 2913 kilogram per hectare in 2015-16. Productivity of Maize has shown fluctuations. It has fallen to a low of 2400 kg per hectare in 2009-10 but has been rising after 2011-12. In 2015-16 the Productivity of maize is 3057 kg.

Productivity of oil seeds is 1565 kg in 2013-14 slightly lower than 1587 kg in 2012-13. The productivity of groundnut from 2009-10 to 2015-16 is shown in chart.

Highest yield for rice crop is registered in Nizamabad and Lowest in Rangareddy district. The gap between the State average and the district yields in rice crop is high in Mahabubnagar, Rangareddy, and Adilabad. Yield gaps are also high for jowar, maize, redgram, blackgram, bengalgram, cotton, turmeric for south Telangana. North Telangana has advantage in crops like rice, jowar, maize, redgram, bengalgram, gingelly, tobacco. Nizamabad has advantage in rice and redgram, Khammam has advantage in maize, Warangal in cotton. These crops and districts can be identified as drivers for furthering agricultural growth.

## 7.HORTICULTURE

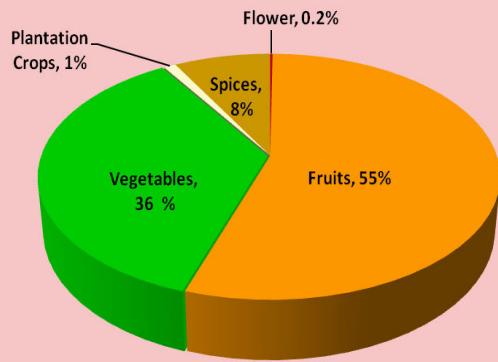

Horticulture is a major sub sector of agriculture sector and important for its growth. Horticulture is a significant contributor to the economy by generating employment to unskilled and semiskilled rural poor. As per the 1st Advanced Estimates, horticulture crops are grown in an area of 7.01 lakh hectares in 2015-16 producing about 74.79 MTs output. Of the total horticulture cultivated area, fruits constitutes around 54.5%, followed by vegetables and spices with 22.2% and 19.1% respectively. Floriculture constitute about 0.4% of area under horticulture. Out of the total production of horticulture in 2015-16, fruits constitute around 55% followed by vegetables, spices and flowers with 36%, 8% and 0.2% respectively.

### DISTRIBUTION OF AREA AND PRODUCTION AMONG HORTICULTURE CROPS

A. Area under Horticulture Crops in Telangana - 2015-16 ( AE)

B. Production of Horticulture Crops in Telangana - 2015-16 ( AE)

Out of the total horticulture area, highest area is covered by mango 29%, followed by mosambi 19%. Among vegetable crops, tomato and onion cover around 33% and 15% of the area respectively and 39 % and 16% of production under vegetable. Among spices, the turmeric and red chilli cover around 41% and 31% of the area and 55% and 20% of production respectively. Among flowers, marigold covers around 50% of the area and 65% of production.

**Major Schemes for promotion of Horticulture in Telangana:**

**1) Micro Irrigation Project:** The major objective of the Micro Irrigation scheme is to achieve more productivity with less water through micro irrigation system. In addition, micro irrigation benefits farmers with less fertiliser, pesticide use, labour cost. Estimated monetary benefits accruing through micro irrigation in the State is given in the Table .

**Impact evaluation of the Telangana State Micro Irrigation Project**

1	Area covered	5.33 lakh ha (13.17 lakh acres)
2	Additional Productivity	Rs.790.20 Cr @ Rs.6000/- per acre
3	Labour saving	Rs.263.40 Cr @ Rs 2000/- per Acre
4	Fertilizer & Pesticides Saving	Rs.131.70 Cr @ Rs 1000/- per Acre
5	Energy saving	Rs 171.21 Cr @ Rs 4/- per Unit
6	Water saved (145.4 TMC)	Rs 13,170 Cr @ Rs1.00 lakh /Acre)

Recognising the importance of micro irrigation, subsidy is extended upto 5 hectares of land to all categories of farmers as compared to the earlier limitation of Rs. 1.0 lakh subsidy per family with coverage of 1Ha in erstwhile Andhra Pradesh.100 percent subsidy is being provided to farmers belonging to Scheduled Castes and Scheduled Tribes, 90 percent to small and marginal farmers and 80 percent to other farmers. Farmer having once availed subsidy under MIP, is eligible for fresh sanctions after a period of 5 years. During the year 2015-16, it is proposed to cover an area of 39,620 hectares and so far about 36,852 hectares is covered under the scheme.

**2) Establishment of Green Houses/ Polyhouses:** Establishment of Green Houses/ Polyhouses is a flagship programme of the State Government. Polyhouses scheme is being implemented since 2014-15 with the following major objectives: (i) Enhancing productivity per unit area, (ii) Promotion of high value Horticulture crops under Poly houses, and (iii) Year round production of flower and Vegetable crops.

The Polyhouse Scheme is being implemented to encourage year round production of vegetable and flower crops to enhance productivity and to meet the demand. Farmers are provided 75 percent subsidy with a maximum of Rs 29.52 lakh per acre. Beneficiaries are eligible up to minimum of 200 sq.mts., and maximum of 3 acres. Preference is given to small farmers with a landholding of 0.5 to 1.0 acre area.

The farmers are given choice for construction of poly houses on their own or through registered companies. So far in an extent of 245 acres works were initiated and the number of beneficiaries covered are 196, in Rangareddy, Medak, Mahabubnagar, Nalgonda and Karimnagar districts.

**3) Mission for Integrated Development of Horticulture:** Mission for Integrated Development of Horticulture scheme is a sub scheme of National Horticulture Mission, being implemented to promote holistic growth of horticulture sector through research, technology promotion, extension, post-harvest management, processing and marketing. Rs. 81 crore have been allocated for implementation of the scheme during 2015-16, of which Rs.36.27 crore have been spent so far on activities such as establishment of new gardens, rejuvenation of senile gardens, training, farm mechanization and post-harvest management etc.

**4) Post-Harvest Management:** Horticulture crops are highly perishable and require special attention on harvesting, handling, packaging, storage and processing operations. The focus is on development of post-harvest infrastructure facilities like Pack houses, Cold storages, Refer Vans, Ripening Chambers etc. Assistance is extended to 8 Cold storages, 3 Ripening Chambers and 55 Turmeric boiling units.

**5) Establishment of Centre of Excellence for fruits, flowers and vegetables crops:** Two Centres of Excellence for fruits, flowers and vegetable crops are being established in the State at Jeedimetla in Rangareddy and Mulugu in Warangal district to supply quality seeds and planting material for farmers growing horticultural crops, apart from providing demonstration and training. A Centre of Excellence for Fruits is also proposed to establish as an Indo-Israeli Project, incorporating all the aspects of fruit cultivation right from planting to post-harvest management. Further, to promote procurement, storage, processing and marketing of horticulture products in the State, it is proposed to set up Telangana Horticulture Development Corporation. Sri Konda Laxman Telangana State Horticulture University has been set up in Medak District.

**6) Urban Farming:** Government is providing seed mini-kits, poly bags, potting mixture, neem cake, neem oil and tools at 50% subsidy to cultivate vegetable on terrace and balconies in urban areas. The objective of the Scheme is to encourage urban households to produce sufficient quantities of vegetables throughout the year.

## RICE:

**8.1.1** Rice is the principal crop extensively cultivated in all the districts of the State both in Kharif and Rabi seasons. Paddy crop accounted for 21.38 percent of the total cropped area and 47.99 percent of the total area under Food-grain crops during 2015-16. The area under Rice during 2015-16 was 10.46 lakh hectares as against 14.15 lakh hectares in 2014-15, showing a decrease of 26.07 percent over previous year Areas. The area under Rice decreased due to unfavorable seasonal conditions and inadequate water in Irrigation Sources during the current year. The Nalgonda District is at the top with an area of 2.13 lakh hectares followed by Warangal 1.81 lakh hectares, Karimnagar 1.70 lakh hectares, Khammam 1.22 lakh hectares, Nizamabad 0.98 and Mahabubnagar 0.96 lakh hectares.

**8.1.2** The production of Rice during 2015-16 was at 30.47 lakh tonnes as against 45.45 lakh tonnes in 2014-15, showing a decrease of 32.96 percent over previous year. The Production was decreased due to decrease in the area significantly and unfavorable seasonal conditions during the current year when compared to previous year.

**8.1.3** The productivity of Rice is 2913 Kgs/hect in 2015-16 as against 3211 Kgs/ hect. in 2014-15 showing a decrease of 9.28 percent over previous year. The area, productivity and production of Rice Crop from 2000-01 to 2015-16 are given in table 8.1.

## **JOWAR :**

**8.2.1** Jowar is the principal food grain crop in the State. It is sown both in Kharif and Rabi seasons mostly under rain fed conditions. This crop accounted for 1.56 percent of the total cropped area and 3.50 percent of the total food grain cropped Area in the State. Jowar Crop is predominantly grown in the districts of Mahabubnagar, Adilabad, Medak, Rangareddy and Nizamabad . These districts together accounted for 94.98 percent of the total area under this crop during 2015-16 in the State. The area sown under jowar was 0.76 lakh hectares during 2014-15 as against 0.79 lakh hectares in 2014-15, showing a decrease of 3.80 percent.

**8.2.2** The production of jowar was 0.76 lakh tonnes during 2015-16 as against 0.83 lakh tonnes in 2014-15, showing a decrease of 8.43 percent. The decrease in production is mainly due to decrease in area during the year 2015-16 .

**8.2.3** The yield rate of jowar was 991 Kgs per hectare during 2015-16, as against 1054 kgs per hectare 2014-15, showing a decrease of 5.98 percent over the previous year. The area, productivity and production of Jowar crop from 2000-01 to 2015-16 are given in Table – 8.2.

## **B A J R A:**

**8.3.1** Bajra crop is generally sown under rain-fed conditions in kharif season and as irrigated in Rabi season in the State. The Bajra crop predominantly grown in Adilabad, Nizamabad, Mahabubnagar and Karimnagar districts. During the year 2015-16 these districts together accounted for 92.97 percent of the total area under the crop in the state during 2015-16. The area cultivated under this crop is 0.06 lakh hectare in the year 2015-16 as against 0.11 lakh hectare in 2014-15 showing a decrease of 45.45 percent.

**8.3.2** The production of Bajra was 0.06 lakh tonnes in 2015-16 as against 0.11 lakh tonnes during previous year i.e., 2014-15 showing a decrease of 45.45% when compared to previous year i.e., 2014-15.

**8.3.3** The average yield rate of Bajra was 938 kgs/hect. in 2015-16 as against 937 kgs/hect. in 2014-15, showing a slight increase of 0.11 percent. The area, productivity and production of Bajra crop from 2000-01 to 2015-16 are given in Table 8.3.

## **R A G I :**

**8.4.1** Ragi crop is sown both under rain fed and irrigation conditions in Khairf and Rabi seasons respectively . Mahaboobnagar District alone accounted for 76.63 percent and followed by Rangareddy District 22.50 percent of the total area under the crop in the state during 2015-16. The area sown under Ragi was 0.01 lakh hectare during 2015-16 as against the same 0.02 lakh hectare in 2014-15.

**8.4.2** The production of Ragi was 0.01 lakh tonnes in 2015-16 as against 0.02 lakh tonnes in 2014-15 as such production was decreased during the current year over previous year.

**8.4.3** The yield rate of Ragi was 559 in 2015-16 as against 1145 Kgs/hect. in 2014-15, showing a decrease of 51.18 percent when compared to previous year. The area, productivity and production of Ragi crop from 2000-01 to 2015-16 are given in the Table— 8.4.

## **MAIZE :**

**8.5.1** Maize crop is predominantly grown in Telangana State. This crop accounted for 11.71 percentage of the total cropped area in the State during 2015-16. The Maize is large extent grown in the districts of Mahabubnagar, Medak, , Karimnagar Warangal , Rangareddy and Nizamabad districts and these districts together accounted for 92.22 percent of the total area under the crop in the State and Mahabubnagar district alone accounted for 28.38 percent of total area under the crop. The area under Maize was 5.73 lakh hectares during 2015-16 as against 6.92 lakh hectares in 2014-15, showing a decrease of 17.20 percentage over previous year.

**8.5.2** The production of Maize was estimated at 17.51 lakh tonnes during 2015-16 as against 23.08 lakh tonnes in 2014-15, showing a decrease of 24.13 percent over previous year due to decrease in the area and also decrease of average yield per hectare during 2015-16.

**8.5.3** The average yield rate of Maize was 3057 Kgs/hect. in 2015-16 as against 3338 Kgs/hect. in 2014-15, showing a decrease of 8.42 percent over previous year. The area, productivity and production of Maize from 2000-01 to 2015-16 are given in the Table –8.5.

## PULSES:

**8.6.1** Pulses comprise Redgram, Bengalgram, Greengram, Blackgram, Horsegram Cowgram and other pulses. The area under these pulses accounted for about 9.64 percent of the total cropped area and 21.64 percent of the total food grains cropped area in the State during 2015-16. The area under pulses was 4.72 lakh hectares during 2015-16 as against 4.08 lakh hect. in 2014-15, which shows an increase of 15.69 % over previous year.

**8.6.2** Out of 2.47 lakh tonnes of production of pulses in the State during 2015-16 Redgram, Greengram, Bengalgram and Blackgram Crops reported 1.05, 0.56, 0.50 and 0.18 lakh tonnes respectively and these crops production constitutes 92.71 per cent of the total pulses production. The productin of pulses was 2.47 lakh tonnes during 2015-16 as against 2.62 lakh tonnes in 2014-15, showing a decrease of 5.73 percent over previous year. The decrease in production is due to decrease in the area under pulses crops and also decrease in yields of major pulses crops during 2015-16. The area and production of pulses from 2000-01 to 2015-16 are shown in the Table –8.6.

## **REDGRAM**

**8.7.1** Redgram crop is sown predominantly under rain-fed conditions extensively in Kharif season only. The crop is sown in the months of June to August in the State. This crop is largely grown in Mahabubnagar, Adilabad, Ranga Reddy ,Medak and Nalgonda districts which together accounted for 92.52 percent of the total area under this crop in the State during 2015-16. Mahabubnagar district alone accounts for 46.59 percent of total area under this crop. The area under Redgram crop during 2015-16 was 2.49 lakh hectares as against 2.21 lakh hectares in 2014-15 showing an increase of 12.67 percent over previous year.

8.7.2 The production of Redgram crop during 2015-16 was 1.05 lakh tonnes as against 1.09 lakh tonnes in 2014-15, showing a decrease of 3.67 percent due to decrease in area and yield rate during 2015-16 over previous year.

8.7.3 The yield rate of Redgram was 421 kgs per hectare in 2015-16 as against 495 kgs per hectare in 2014-15, showing a decrease of 14.95 percent. The Area, Productivity and Production of Redgram from 2000-01 to 2015-16 are given in the Table –8.7.

## **BENGALGRAM**

**8.8.1** Bengal gram is mostly grown in Rabi season. The crop is sown in the month of October and November and in limited extent in the month of December also. The crop is grown extensively under rainfed conditions .The crop is predominantly grown in Mahabubnagar, Nizamabad, Adilabad, and Medak Districts which together accounted for 91.39 percent of the total area under the crop in the state during 2015-16 and Mahabubnagar district alone accounts for 31.63 percent of the total area under the Bengalgram crop in the State. The area under Bengalgram Crop during 2015-16 is at 0.70 lakh hectares as against 0.59 lakh hectares in 2014-15, showing a significant increase of 18.64 percent during the current year over previous year.

**8.8.2** The production of Bengalgram has been decreased to 0.50 lakh tonnes in 2015-16 as against 0.81 lakh tonnes in 2014-15, showing a decrease of 38.27 percent. The production is decreased due to steep decrease in area and major decrease in yield per Hectare during 2015-16.

**8.8.3** The average yield rate of Bengalgram was recorded at 721 Kgs per hectare. in 2015-16 as against 1370 Kgs per hectare in 2014-15 showing a decrease of 47.37 percent . The area, productivity and production of Bengal gram crop in the state from 2000-01 to 2015-16 are shown in the Table-8.8.

## **GREENGRAM**

**8.9.1** Greengram crop is sown in both Kharif and Rabi seasons but it is sown more extensively in Kharif season. The crop is sown as an early Kharif crop in May and June and is harvested during August and September months. The area under Greengram crop during 2015-16 was 1.11 lakh hectares which constituted 2.27 percent of the total cropped area and 23.51 percent of the pulses cropped Area in the State. The crop is extensively sown in Medak, Nalgonda, Warangal, Khammam, and Mahabubnagar districts which together accounted for 78.60 percent of the total area under the crop in the State during 2015-16. The area under Greengram crop during 2015-16 was 1.11 lakh hectares as against 1.88 lakh hectares in 2014-15 showing an increase of 26.14 percent.

**8.9.2** The production of Green gram crop during 2015-16 was 0.56 lakh tonnes as against 0.45 lakh tonnes in 2014-15, showing an increase of 24.44 percent and it was attributed mainly due to decrease in the area and yield rate during 2015-16.

**8.9.3** The average yield of Green gram was 512 Kgs per hectares in 2015-16 as against 513 Kgs per hectare showing a decrease of 0.19 percent over previous Year. The area, productivity and production of Green gram crop from 2000-01 to 2015-16 are shown in the Table - 8.9.

## **BLACKGRAM**

**8.10.1** Blackgram crop is sown in both Kharif and Rabi seasons but mostly in Kharif season. The crop is predominantly grown in Medak, Nizamabad ,Adilabad, Rangareddy and Mahabubnagar districts which together accounted for 83.02 percent of the total area under the crop in the State during 2015-16, Medak district alone accounts for 40.41 percent of total area under the crop. The area sown under the Blackgram was 0.32 lakh hectares in 2015-16 as against 0.28 lakh hectares 2014-15, showing an increase of 14.29 percent over previous Year.

**8.10.2** The production of Blackgram crop was 0.18 lakh tones during 2015-16 as against 0.16 lakh tonnes in 2014-15. The production of Blackgram during the current year is increased by 12.50 percent when compared to the previous year. The decrease in production is due to decrease in area and also decrease in average yield per hectare of the crop in 2015-16 when compared to the previous year 2014-15.

**8.10.3** The yield rate of Blackgram was decreased to 546 kgs/hect, in 2015-16 when compared to 583 kgs/hect. in 2014-15 which shows a decrease of 6.35 % during 2015-16. The area, productivity and production of Blackgram crop from 2000-01 to 2015-16 are shown in the Table –8.10.

## **HORSEGRAM**

**8.11.1** Horsegram crop is grown in both kharif and Rabi seasons but extensively in Rabi season only. The area under Horsegram is 0.02 lakh hectares during 2015-16 and it was 0.02 lakh hectares during 2014-15. This crop is predominantly grown in Mahabubnagar , Nalgonda, Medak and Rangareddy districts these 4 districts together accounted for 90.69 percent of the total area under the crop in the state during 2015-16. Mahabubnagar district alone accounted for 44.36 % of the total Horsegram Crop in the State.

**8.11.2** The production of Horsegram was 0.01 lakh tonnes during 2015-16 and it was 0.01 lakh tonnes during 2014-15. The production of 0.01 lakh tonnes which was reported during the current year was static, there was neither increase nor decrease in the production over previous year.

**8.11.3** The average yield per hectare during 2015-16 was 389 Kgs per hectare and it was 413 kgs /hectare during 2014-15. The area, productivity and production of Horsegram from 2000-01 to 2015-16 are given in Table –9.11.

### **COWGRAM**

**8.12.1** Cowgram crop is mostly grown in Karimnagar , Warangal, Medak ,Nalgonda and Khammam districts which together accounts for 85.12 percent of the total area under the crop in the State. The area sown under Cowgram was 0.08 lakh hectares in 2015-16 as against 0.10 lakh hectares in 2014-15 showing a decrease of 20 % over previous year.

**8.12.2** The Production of Cowgram is 0.17 lakh tonnes in 2015-16 as against 0.10 lakh tones during the previous year i.e 2014-15 showing an increase of 70 percent. over previous year.

**8.12.3** The yield rate of Cowgram was increased to 2109 Kgs/Hect in 2015-16 as against was 972 Kgs/ Hects in 2014-15 showing an increase of 116.97 percent over previous year. The area, productivity and production of Cowgram from 2000-01 to 2015-16 are given in the Table – 8.12.

## **OTHER PULSES**

8.13 Other Pulses comprise of Rajma Beans , Anumulu, Mysoor Pappu/ yerra Pappu and Other Pulses not specified as pulses in any where. Out of all these crops Rajma Beans play a vital role in other pulses . Other Pulses are grown in both Kharif and Rabi seasons, Other pulses sown in Adilabad, Nizamabad, Karimnagar and Medak districts only these 4 Districts accounted for 100.00 percent of the total area under other pulses crops in the State. The area, productivity and production of other pulses from 2000-01 to 2015-16 are given in the Table – 9.13.

## **SUGARCANE**

8.14.1 Sugarcane is an important commercial crop in the state. It is mainly grown as irrigated crop. Adsali variety crop which is grown only in Nizamabad district and it is a long duration crop of more than one year sown in the month of December/January and harvested in February/March of the succeeding year. Medak , Nizamabad and Khammam districts together accounted for 84.89 percent of the total area under the crop in the state during 2015-16. Medak district alone accounts for 50.94 % of total area under sugarcane crop in the state. The area under Sugarcane (Coming for Harvest) was 0.35 lakh hectares in 2015-16 as against 0.38 lakh hect. in 2014-15, showing a decrease of 7.89 percent during 2015-16 when compared to previous year.

**8.14.2** The production of Sugarcane was estimated at 24.05 lakh tonnes of cane and 2.44 lakh Tonnes of Gur during 2015-16 as against 33.43 lakh tonnes of Cane and 3.35 lakh Tonnes of Gur in 2014-15 showing a decrease of 28.06 of Cane and 27.16 percent of Gur over previous year. The decrease is attributed to decrease in area of the crop over previous year.

**8.14.3** The yield rate of Sugarcane (cane) was 68911 Kgs/hect. in 2015-16 as against 87654 kgs/hect. in 2014-15 showing a decrease of 21.38 percent. The yield rate of Gur was 6985 Kgs/hectare In 2015-16 as against 8783 Kgs / Hectare in 2014-15 showing a decrease of 20.47 percent over previous year. The area, productivity and production of Sugarcane from 2000-01 to 2015-16 are shown in Table –8.14.

## **CHILLIES**

**8.15.1** Chillies is one of the important crop in condiments and Spices group. The crop is grown both under irrigated and unirrigated conditions in both kharif and rabi seasons. The area under chillies during the year 2015-16 was 0.80 lakh hectares and 1.63 percent of gross cropped area covers under chillies crop. The crop is more extensively grown in Khammam , Warangal and Mahabubnagar districts. These three districts together account for 86.00 percent of the total area under the crop in the state and Khammam district alone accounts for 38.50 percent of total area under the crop. The area sown under chillies was 0.80 lakh hectares during 2015-16 as against 0.73 lakh hectares in 2014-15 showing an increase of 9.59 percent.

**8.15.2** The production of chillies was 2.28 lakh tonnes in 2015-16 as against 2.53 lakh tonnes in 2014-15, showing a decrease of 9.88 percent. The decrease in Production was due to decrease in average yield per hectare of the crop .

**8.15.3** The average productivity of Chillies is 2789 kgs per hectare in 2015-16 as against 3456 kgs/hect. in 2015-15 showing a decrease of 19.30 percent over previous year. The area, productivity and production of Chillies from 2000-01 to 2015-16 is given in Table –8.15.

## **ONIONS**

**8.16.1** Onion crop is one of the important vegetable crops in the state. It is grown in both Kharif and Rabi seasons mostly in Rabi season in the State mainly under irrigated conditions. An area of 0.16 lakh hectares under Onion crop during 2015-16. It is extensively cultivated in Mahabubnagar, Medak, Rangareddy and Nizamabad districts. These districts together account for 91.73 percent of the total area under the crop in the State. Mahabubnagar district alone accounted for 37.98 percent of the total area under the Crop. During the year 2015-16 the area cultivated under the crop was 0.16 lakh hectare as against 0.14 lakh hectare in 2014-15 showing an increase of 14.29 percent over previous year.

**8.16.2** The production of Onion crop is estimated at 3.90 lakh tonnes in 2015-16 as against 3.15 lakh tonnes in 2014-15 showing an increase of 23.81 percent over previous year. The increase was attributed to mainly increase in yield rate per hectare and area also increased same extent.

**8.16.3** The productivity of Onions was estimated at 24781 Kgs per hectares in 2015-16 as against 22620 Kgs/hect. in 2014-15, showing an increase of 9.55 percent over previous year. The area, productivity and production of Onions crop from 2000-01 to 2015-16 are presented in the Table –8.16.

## **OIL SEEDS :**

**8.17.1** Telangana is one of the important States in the country which grows Oil seed crops like Groundnut, Seasamum , Soyabean, Sunflower and Castor etc,. The area under Oil seeds during 2015-16 was 4.54 lakh hectares which constitutes 9.28 percent of the total cropped area in the State. The area under oil seeds was 4.54 lakh hectares during 2015-16 as against 5.00 lakh hectares during 2014-15, showing a decrease of 9.2 percent over previous year. Oil seeds crops predominantly grown in Mahabubnagar, Nizamabad and Adilabad Districts.These Districts together accounted for 76.67 percent of the total area under the oil seed crops in Telangana State during 2015-16.

**8.17.2** Out of 5.79 lakh tonnes of production of oil seeds, Groundnut, Palm oil, Castor and sunflower Crops Production was 2.06, 0.83, 0.17 and 0.13 lakh tonnes respectively which together accounted for 55.09 percent of the total oil seeds production in the State. Palm Oil Production is estimated to 0.83 lakh tonnes during 2015-16 as against 0.92 lakh tonnes during 2014-15 showing a decrease of 9.97 percent over previous year. The production of oil seeds was 5.79 lakh tonnes during 2015-16 as against 7.20 lakh tonnes in 2014-15, showing a decrease of 19.69 percent over previous year. The area and production of Oil seeds from 2008-09 to 2015-16 are shown in Table –8.17.

## **GROUNDNUT**

**8.18.1** Groundnut is one of the important Oilseed and commercial crops in Telangana State . This crop is mostly cultivated under irrigation sources in Rabi season and is cultivated in almost all districts. The area under Groundnut crop during 2015-16 was 1.28 lakh hectares which constitutes 2.61 percent of the total cropped area in the State and 28.18 percent of the Total oil Seeds cropped area in the state. Mahabubnagar, Warangal and Nalgonda districts together accounts for 86.66 percent of the total area of Groundnut crop in the state during 2015-16 . Mahabubnagar district alone accounts for 61.86 percent of the total area under the Groundnut crop in the State. The area sown under Groundnut Crop was 1.28 lakh hectares during in 2015-16 as against 1.55 lakh hectares in 2014-15 showing a decrease of 17.42 percent over previous year.

**8.18.2** In terms of production, during the year 2015-16 Groundnut crop Production reported at 2.06 lakh tonnes which is 35.57 percent of the total Oil Seeds production in the state. The production of Groundnut during 2015-16 was 2.06 lakh tonnes as against 2.95 lakh tonnes in 2014-15 showing a decrease of 30.17 percent over previous year. The decrease in production is attributed to decrease in Area during 2014-15.

**8.18.3** The yield rate of Groundnut was 1611 Kgs/hect. In 2015-16 as against 1907 Kgs/hect. in 2014-15 showing a decrease of 15.52 percent. The area, productivity and production of Groundnut from 2000-01 to 2015-16 are presented in table-8.18.

### **SEASAMUM (GINGELLY)**

**8.19.1** The crop is cultivated in both Kharif and Rabi seasons and mostly cultivated during Rabi season in the state. Adilabad, Karimnagar, Warangal and Nizamabad Districts which together accounts for 87.02 percent of the total area under the crop in the state during 2015-16. Adilabad District alone accounted for 30.22 percent of the total cropped area under Sesamum crop in the State. The area sown under Sesamum crop was 0.14 lakh hectares in 2015-16 as against 0.24 lakh hectares in 2014-15, showing a decrease of 41.67 percent over previous year.

**8.19.2** The production of Sesamum was 0.03 lakh tonnes in 2015-16 as against 0.10 lakh tonnes in 2014-15, showing a decrease of 70.00 percent during the current year 2015-16.

**8.19.3** The yield rate of Sesamum was 210 kgs/hectare in 2015-16 as against 405 kgs/hectare in 2014-15 showing a decrease of 48.15 percent. The area, productivity and production of Sesamum from 2000-01 to 2015-16 are given in table-8.19.

## SUNFLOWER

**8.20.1** Sunflower is an important oil seed crop in the State. It is cultivated in both Kharif and Rabi seasons and mostly cultivated in Rabi season. It is extensively cultivated in Medak, Nizamabad and Mahabubnagar districts and these districts together accounted for 92.33 percent of the total area under the crop in the state during 2015-16. Medak district alone accounted for 45.00 percent of the total area under the crop in the State. The area sown under Sunflower was 0.12 lakh hectare in 2015-16 as against 0.18 lakhs hectares in 2014-15 showing a decrease of 33.33 percent.

**8.20.2** The production of Sunflower was 0.13 lakh tonnes in 2015-16 as against 0.26 lakh tonnes in 2014-15 showing a decrease of 48.00 percent over previous year. The decrease in production is attributed to the decrease in the average yield per hectare during the year 2015-16.

**8.20.3** The yield rate of sunflower was 1154 kgs./hect in 2015-16 as against 1397 kgs/hectare. in 2014-15, showing a decrease of 17.39 percent. The area, productivity and production of Sunflower from 2000-01 to 2015-16 are presented in Table –8.20.

## **CASTOR**

**8.21.1** Castor is cultivated mostly in kharif season in the State. It is extensively cultivated in Mahabubnagar, Medak, Rangareddy, Warangal and Nalgonda districts. These districts together account for 99.66 percent of the total area under the Castor crop in the State during 2015-16 and Mahabubnagar district alone shared 95.59 percent of total area under the crop. The area sown under Castor was 0.48 lakh hectares in 2015-16 as against 0.51 lakh hectares in 2014-15, showing a decrease of 5.88 percent.

**8.21.2** The production of Castor during 2015-16 was 0.17 lakh tonnes as against 0.29 lakh tonnes in 2014-15, showing a decrease of 43.33 percent due to significant decrease in yield rate per hectare and reduction in Areas during 2015-16 over previous year.

**8.21.3** The yield rate of Castor was 358 kgs/hect in 2015-16 as against 578 kgs./hect. in 2014-15, showing a decrease of 38.06 percent. The area, productivity and production of Castor from 2000-01 to 2015-16 are presented in Table – 8.21.

## COTTON

**8.23.1** Cotton is an important Fibre crop grown in Kharif season in the state, and it has mainly sown as un-irrigated crop. Telangana State is one of the top most states along with Gujarat and Maharashtra States in India in respect of area and production of cotton. During Kharif season, the crop is mainly sown as a rain-fed crop in all the Districts and mostly in Nalgonda, Adilabad, Mahabubnagar, Warangal, Karimnagar, Khammam and Medak Districts, these Districts together accounted for 95.51 % of the total Area under the crop in the State during 2015-16. Area under Cotton crop during the year 2015-16 was 17.73 lakh hectares as against 16.93 lakh hectares in 2014-15, showing an increase of 4.73 percent over previous year.

**8.23.2** The production of Cotton crop in the State was 37.33 lakh bales (lint) of 170 Kgs in 2015-16 as compared to 35.83 lakh bales in 2014-15 showing an increase of 4.19 percent . The increase in production is due to increase in area during 2015-16.

**8.23.3** The yield rate of Cotton crop was 358 Kgs per hectare in 2015-16 as against 360 Kgs per hectare during 2015-16 showing a slight decrease of 0.56 percent over previous year. The area, productivity and production of Cotton crop from 2001-02 to 2015-16 are presented in the table - 8.23.

### **Tobacco**

**8.24.1** Tobacco crop is large extent sown during Rabi season. There are two varieties of Tobacco viz: virginia and natu (desi). Mahabubnagar and Khammam districts together account for 79.42 percent of the total area in the State during 2015-16. Area under Tobacco crop was 0.06 lakh hectares during 2015-16 as against also 0.06 lakh hecs. in 2014-15, showing a static against previous year.

**8.24.2** The production of Tobacco during 2015-16 was 0.15 lakh tonnes as against 0.16 lakh tonnes in 2014-15, showing a decrease of 6.25 percent, due to decrease in Productivity per hectare during 2015-16 .

**8.24.3** The yield rate of Tobacco was recorded at 2617 Kgs/Hectare in 2015-16 as against 2625 Kgs/ hectare during 2014-15 showing an increase of 0.31 percent during 2015-16.

The area, productivity and production of Tobacco from 2000-01 to 2015-16 are given in the Table –8.24.

## 9. INDEX NUMBER OF AGRICULTURAL PRODUCTION 2015-16

The Index Number of Agricultural Production for the year 2015-16 of Area under crops, Productivity (Yields), Net Area Sown, Cropping pattern, Cropping Intensity and Productivity per hectare of net area sown with base Triennium ending 2007-08 are presented utilizing the principles of Lasplayers Index . 44 crops are covered for this purpose which is divided into two main groups i.e., 1) Food Grains 2) Non-Food Grains which in turn are sub-grouped as shown below.

<b>Sl. No</b>	<b>Main group</b>	<b>Sub-Group</b>	<b>Crops Covered</b>
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>	<b>(4)</b>
1	Food Grains	i. Cereals	Rice,Wheat,Jowar,Bajra, Maize,Ragi and Korra
		ii.Pulses	Bengalgram, Redgram, Greengram, Blackgram, Horsegram, Cowgram and Other pulses.
2	Non- Food Grains	i. Oil Seeds	Groundnut, Sesamum, Sunflower, Safflower, Castor, Rape and Mustard, Linseed and Soyabean .
		ii. Fibres	Cotton .
		iii. Fruits & Vegetables.	Potato, Onions, Banana(H), Cashewnut, Bhen-di, Tomato, Brinjal, Mangoes, Acid Lime , Batavia, Guava, Sapota, Papaya and Sweet Potatoes.
		iv. Condiments	Chillies, Turmeric, Coriander, Ginger and Tamarind
		v. Other crops	Sugarcane , Tobacco.

The area under the above 44 crops constituted 97.54 percent of the total cropped area in the state during 2015-16.

### **Index Number of Area under crops**

The Index number of area under all crops was decreased by 10.19 percent over the previous year. Pulses crops Index number increased i.e., 15.57% Condiments and Spices 5.16% and Fibres 4.74 %. Cereals & Millets Index number is decreased i.e., 22.51% followed by Food grains 16.55%, Oil seeds 9.50% and Fruits and Vegetables 2.59 %. The Index number of area under different crops for the year from 2011-12 to 2015-16 are given in the table .

### **INDEX NUMBER OF AREA UNDER CROPS FROM 2011-12 TO 2015-16**

(Base: Triennium ending 2007-08 =100)

Sl. No.	Crop Group	2011-12	2012-13	2013-14	2014-15	2015-16	% of Deviation in 2015-16 over 2014-15
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1	CERE.&MILLETS	104.73	93.54	120.86	92.69	71.83	-22.51
2	PULSES	88.92	87.84	80.01	58.72	67.86	15.57
3	FOODGRAINS	101.15	92.25	111.62	85.00	70.93	-16.55
4	OIL SEEDS	67.90	76.83	88.76	75.67	68.48	-9.50
5	FIBRES	205.59	235.78	221.49	220.19	230.62	4.74
6	CONDIMENTS AND SPICES	100.12	1484.97	86.17	81.18	85.37	5.16
7	FRUITS AND VEGETABLES	106.03	102.10	108.63	107.66	104.87	-2.59
8	OTHER CROPS	22.11	18.46	18.43	17.96	16.53	-7.96
9	NON- FOODGRAINS	120.91	236.99	132.55	127.26	128.77	1.19
10	TOTAL CROPS	108.97	149.55	124.22	105.75	94.97	-10.19

### **Index Number of Productivity of crops**

The Index number of productivity of all crops were decreased by 2.03 percent when compared to the previous year. The decrease is reflected in all categories except Fruits and Vegetables category . The productivity index of crops under sub-groups i.e., Cereals and Millets, Pulses, Food Grains, Oil seeds , Fibres, Condiments and Spices and Non-Foodgrain Crops decreased by 9.14%, 18.57%, 14.58%. 14.24%, %,0.57%, 15.55% and 0.03% over the previous year. The Index number of productivity under different crop groups for the year from 2011-12 to 2015-16 are given in the Table .

#### **INDEX NUMBER OF PRODUCTIVITY UNDER CROPS FROM 2011-12 TO 2015-16**

(Base: Triennium ending 2007-08 =100)

Sl. No.	Crop Group	2011-12	2012-13	2013-14	2014-15	2015-16	% of Deviation in 2014-15 over 2013-14
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1	CERE.&MILLETS	90.30	108.76	111.00	98.50	89.50	-9.14
2	PULSES	64.63	108.41	112.62	86.82	70.70	-18.57
3	FOODGRAINS	91.16	109.82	117.69	104.39	89.17	-14.58
4	OIL SEEDS	105.10	124.12	122.39	108.87	93.37	-14.24
5	FIBRES	44.22	74.41	147.58	125.64	124.92	-0.57
6	CONDIMENTS AND SPICES	93.40	33.91	102.14	100.74	85.07	-15.55
7	FRUITS AND VEGETABLES	89.30	93.68	120.78	49.55	102.93	107.73
8	OTHER CROPS	341.84	379.52	359.25	365.31	285.96	-21.72
9	NON- FOOD GRAINS	68.05	49.72	89.52	73.31	73.29	-0.03
10	TOTAL CROPS	79.65	73.78	100.17	86.27	84.52	-2.03

### **Index Number of Production of crops**

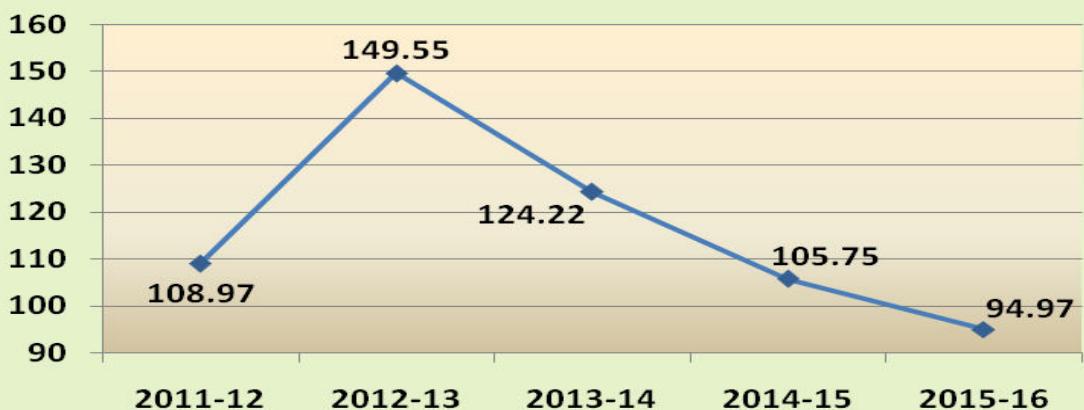

The Index Numbers of Agricultural production of all crops registered a decrease of 12.01 percent during 2015-16 over the previous year. The Index Number of Fruits and Vegetables is increased by 102.32%, fibers 4.34 and Non food grains 1.17%. Among the Food and Non food crops cereals and millets, food grains, oil seeds , Condiments and Spices and Pulses recorded a decrease of 29.58 %,28.72 %, 22.38 %, 11.20 %, and 5.88 % respectively in Index of Agriculture of production during 2015-16 over the previous year. The Index Numbers of production under different crop groups for the year from 2011-12 to 2015-16 are given in table .

#### **INDEX NUMBER OF PRODUCTION UNDER CROPS FROM 2011-12 TO 2015-16**

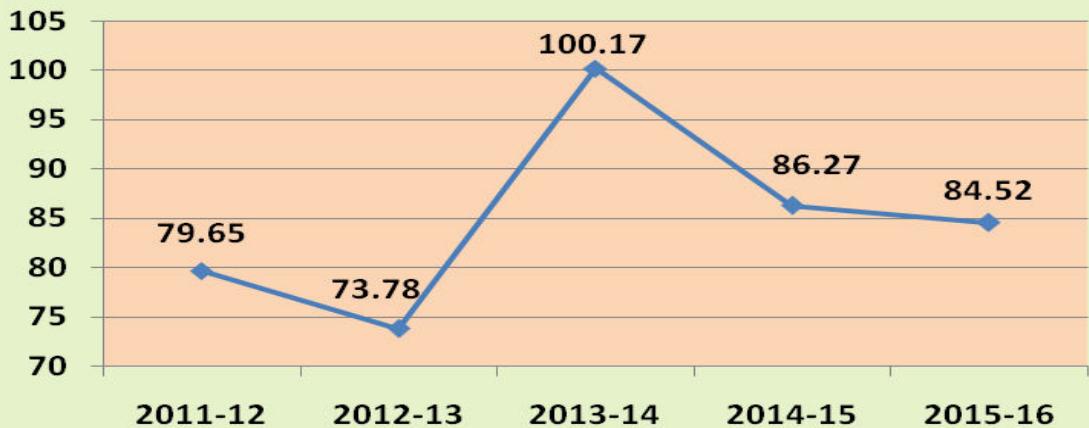

(Base: Triennium ending 2007-08 =100)

Sl no	Crop Group	2011-12	2012-13	2013-14	2014-15	2015-16	% of Deviation in 2014-15 over 2013-14

### INDEX OF AREA

### INDEX OF PRODUCTIVITY

### INDEX OF PRODUCTION

### **Cereals & Millets Sub-Group**

The production Index of Cereals and Millets Sub-Groups during the year 2015-16 reported a decrease of 29.58 percent over the previous year. The indices of Rice, Jowar, Bajra and Maize reported a decrease of 32.95 , 9.07, 47.35 and 24.13 percent respectively over the previous year whereas the production indices of Wheat recorded an increase of 143.93 percent over the previous year 2014-15.

### **Pulses Sub-Group**

The production index of pulses Sub-Groups recorded a decrease of 5.88 percent over the previous year. Under Sub-Groups of pulses crops production Index of Cowgram, Greengram and Blackgram crops recorded an increase 74.48 % , 24.04 % and 7.19 % over the previous year 2014-15. whereas the production indices of Horsegram, Redgram, Bengalgram and Other Pulses showing a decrease of 16.67, 4.06 , 38.05 and 68.74 percent respectively over the previous year 2014-15.

### **Oil Seeds Sub-Group**

The Production Index Number of Oil Seeds Sub-Group decreased by 22.38 % over the previous year. The production indices of Groundnut, Sesamum , Safflower, Sunflower , Rape & Mustard , Soyabean , Castor and Linseed showing a decrease of 30.25, 69.77, 16.75, 48.07, 58.98, 3.94 ,41.41 and 83.37 percent over previous year 2014-15.

### **Condiments & Spices Sub-Group**

The production Index of Condiments & Spices Crops recorded a decrease of 11.20 percent during the year over the previous year. The increase in production Index of Coriander and Tamarind crops were increased by 2.07 and 135.03 percent respectively during the year over the previous year. Whereas a decrease in production Index of chillies , Turmeric and Ginger by 10.13, 14.79, and 28.05 percent respectively over previous year 2014-15.

### **Fibers Sub-Group**

The Index Number of production of the Fibres Sub-Group is increased by 4.34 percent over the previous year. The production indices of Cotton (Kapas) increased by 4.18 percent.

## **Fruits & Vegetables Sub-Group**

The production Index of Fruits & Vegetables Sub-Group reported an increase of 102.32 percent over the previous year. The production indices of Acid lime, Banana , Papaya, Sweet Potatoes and Onions recorded an increase of 42.32,16.70,116.84,53.95 and 23.82 percent respectively during the current year over the previous year. Whereas the production indices of Mango, Batavia, Guava, Sapota, Potatoes, Bhendi, Brinjal, Tomatoes and Cashew nut crops decreased by 18.99,24.38,32.84,10.30,30.98,43.56,40.81,22.46 and 6.30 percent during the current year over the previous year.

### **Index of Net Area Sown**

The Index of Net Area Sown was 102.06 during 2015-16 as against 107.00 in 2014-15 showing a decrease of 4.62 percent.

### **Index of Cropping Intensity.**

The Index of Cropping Intensity has decreased to 91.61 in 2015-16 from 97.30 in 2014-15, showing a decrease of 5.85 percent over previous year.

### **Index of Cropping Pattern**

The Index of Cropping Pattern during the year 2015-16 is 106.20 as against 95.62 in 2014-15 showing an increase of 11.06 percent over previous year.

### **Index Number of Productivity per Hectare of Net Area Sown.**

The Index Number of Productivity per Hectare of Net Area Sown during the year 2015-16 decreased to 111.78 from 116.70 in 2014-15, showing a decrease of 4.22 percent over the previous year.

### **INDEX NUMBER OF NET AREA SOWN, CROPPING INTENSITY, CROPPING PATTERN AND PRODUCTIVITY PER HECTARE OF NET AREA SOWN**

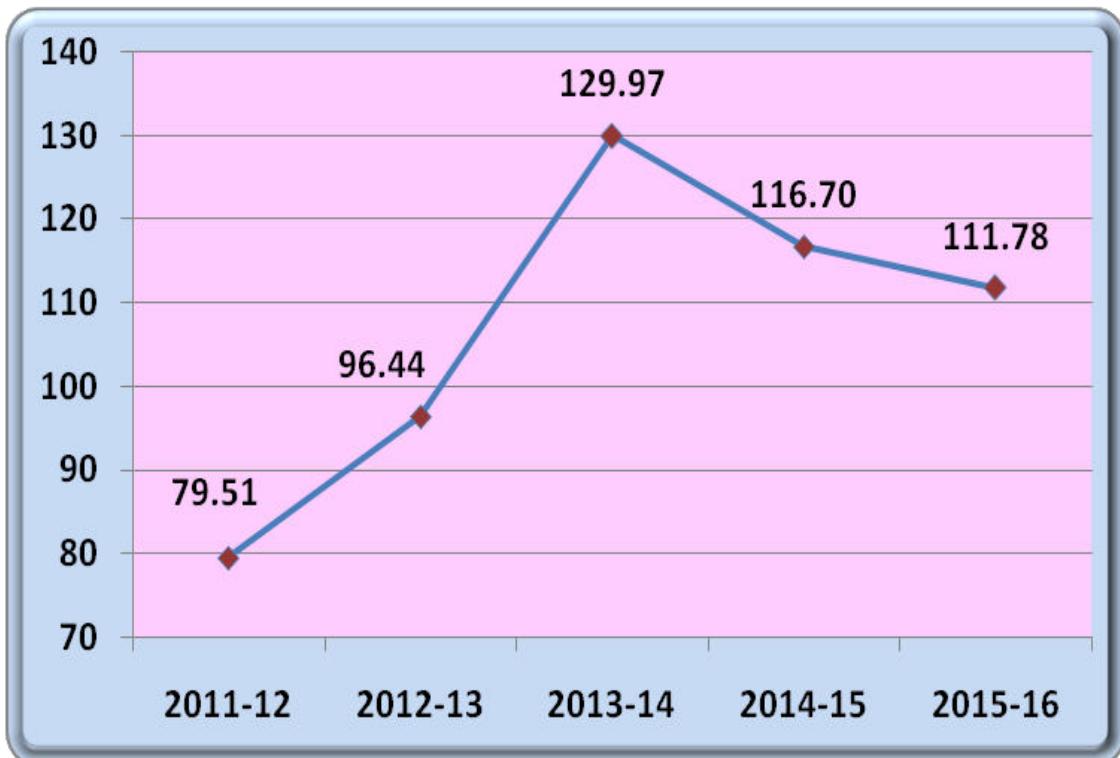

(Base: Triennium ending 2007-08 =100)

Sl.No.	Year	Net Area Sown	Cropping Intensity	Cropping Pattern	Productivity per Hectare of Net Area Sown
(1)	(2)	(3)	(4)	(5)	(6)
1	2011-2012	112.45	99.32	95.86	79.51

## 12. CULTIVATORS AND AGRICULTURE WORKERS

### Cultivator:

Cultivator is a person who is engaged as employer or worker in cultivation of certain crops on land owned by him or held by him for payment in money, kind or share. Cultivators include supervision or directions of cultivation. Total number of cultivators are 31.51 lakhs as per 2011 Census.

### Agricultural labourer:

Agricultural labourer is a person working in another persons land for wages in cash or kind. He has no risk of cultivation. Total number of agricultural labourers as per Census 2011 in the State are 59.15 lakhs.

YEAR	TOTAL POPULATION ( IN LAKHS )	GROWTH RATE	RURAL POPULATION ( IN LAKHS )	CULTIVATORS ( In Lakhs )	AGRICULTURAL LABOURS ( In Lakhs )	TOTAL (5+6) ( Cultivators and Agricultural Labours )

### **13. LIVE STOCK AND FISHERIES**

Rearing of Live Stock play an important role in the Economy, especially in the rural areas. Apart from agriculture many rural youth are eking their livelihood in dairy, rearing sheep, goat and pig etc. The prosperity of Agriculture obviously depends upon the Livestock population it has. They are not only helping the farmer in agricultural operations and also helping more in conserving soil health and paving path for healthy crops and conservation of moisture.

Animal Husbandry sector consists of bovine, ovine, pig and poultry population. Bovine population is further classified into cattle and buffaloes and ovine population into sheep and goat. Telangana is well off with livestock resources, especially Sheep population accounting to 19.80% of total Country's sheep population. The State stands 2nd in Sheep population, 13th in Goat population, in the country as per the Livestock Census, 2012.

#### **Production of Milk, Meat and Eggs:**

The State had produced 4440 thousand tonnes of Milk, 1120 crore eggs during 2015-16.

**APPENDIX-I**  
**GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS**

<b>Botanical</b>	<b>English</b>	<b>Telugu</b>
<b>CEREALS</b>		
Oryza Sativa	Paddy	Vadlu
Triticum Species	Wheat	Godhumalu
Sorghum Vulgare	Jowar	Jonnalu
Pennisetum Typhoides	Bajra	Sajja or Ganti
Hordeum Vulgare	Barley	Barley
Zea Mays	Maize	Mokkajonnalu
Eleusine Coracana	Ragi	Ragi and Chodi
Seteria Italica	Korra(Italian Millet)	Korralu
Paspalum Serobiculatum	Varagu	Arikelu
Panicum Milliare	Samai	Samalu
Panicum Milliaceum	Common Millet	Varigalu
<b>PULSES</b>		
Cicer Arietinum	Bengalgram	Shanagalu
Phaseolus Aureus	Greengram	Pesarlu
Cajanus Cajan	Redgram	Kandulu
Phaseolus Mungo	Blackgram	Minumulu
Dolichose Biforus	Horsegram	Ulavalu
Phaseolus aconitifolius	Dwogram	Mittikalu or Kumkumpesalu
Dolichos Lablab	Fieldbean	Anumulu
Vignacatjang	Cowgram cowpea	Alasandalu or Bobbarlu
<b>SUGAR</b>		
Saccharum Officinarum	Sugarcane	Cheruku
Phonix Sylvestris	Date palm	Kharjuramu
<b>CONDIMENTS AND SPICES</b>		
Areca Catichu	Betelnuts	Vakkalu or Pokalu
Cadsicum Annum	Chillies	Mirapakayalu
Zingiber officinale	Ginger	Allam
Curcuma Longa	Turmeric	Pasupu
Allium Sativum	Garlic	Tellagadda , Elligadda or Velluli
Coriandrum Sativum	Coriander	Dhaniyalu or Kottumeri
Tamarindus Indica	Tamarind	Chintapandu

**APPENDIX-I**  
**GLOSSARY OF BOTANICAL, ENGLISH AND TELUGU NAMES OF CROPS**

<b>Botanical</b>	<b>English</b>	<b>Telugu</b>
<b>FRUITS AND VEGETABLES</b>		
Musa Sapientum	Bananas	Aratipandu
Vitis Vinifera	Grapes	Draksha
Magnifera indica	Mangoes	Mamidi
Anacardium Occidentale	Cashewnut	Jeedimamidi
Paidium Guajava	Guava	Jama
Sokanum Tukersoum	Potatoes	Urlagadda, Alugadda
Manihot Utilssima	Topioca	Karapendalam
Ipomaca Batatas	Sweet potatoes	Genusugaddalu or Chilagadam
Allium Cepa	Onions	Ulligadda or Nirulli
Olden Landia Unbellata	Chayroot	Chiriveru
Amaranthus	Amaranths	Thotakoora
Solanum Melongena	Brinjal	Vankaya
Lycopersicum Esculentum	Tomato	Seema vanga
<b>OIL SEEDS</b>		
Arachis hypogaea	Groundnut	Verushenaga
Ricinus communis	Castor	Amudalu
Cocos Nucifera	Coconut	Kobbera
Sesamum indicum	Gingelly, Sesamum	Nuvvulu
Brassica campestris	Rape and mustard	Avalu
Carthamus tinctorius	Safflower	Kusuma
Linum Uitastisimum	Linseed	Avisi
Guizotia Abyssinica	Nigersed	Verrinuvvulu
<b>FIBRES</b>		
Gossypium Sp.	Cotton	Prathi
Hibiscus cannabinus	Bombay Hemp	Gogu
Agave Vivipara	Agave	Kalabanda or Kittanara
<b>DRUGS AND NARCOTICS</b>		
Coffee arabica	Coffee	Coffee
Camellia Theifera	Tea	Theyaku
Borassus Flabellifer	Palmyra	Thati
Piper Betle	Betel vines	Tamalapakulu
Nicotiana Tabacum	Tobacco	Pogaku
Papaver Somniferum	Opium	Nallamandu
<b>MISCELLANEOUS</b>		
Indigofera Tinctoria	Indigo	Neeldi
Phaseous Trilobus	Pillipesara	Pillipesara

**APPENDIX-II  
CONVERSION COEFFICIENTS  
For changing British Units of Weight, Length and Capacity into Metric Units.**

**I. Standards of Weights**

1 Oz	28.3495 Grams
1 Gram	0.0352740 Ounces, 0.09 Tula
1 Pound	0.45359 Kilogram
1 Kilogram	2.20462 Pounds ( Lb),1000 Grams, 35.274 Ounces ( Oz)
1 Tonne (Metric Ton)	0.98420 Tons, 1000 kilograms
	10 Quintals
1 Ounce	28.350 g
1 Ton	1.01605 Metric Tons, 2240 Lbs.
1 Tonne ( Metric Tonne )	1000 Kgs, 10 Quintals
1 Pound	0.037324 Metric Tons, 82.2857 Lbs. 0.4536 Kg ,0.3732 Quintal
1 Cwt	0.5010 Quintal
1 Seer	0.9331 kilogram
1 Bale of Cotton lint (392 Lbs)	0.1771 Metric Ton
1 Metric Ton	5.641 Bales
1 Bale of Jute (400 Lbs).	0.181436 Metric Ton
1 Metric Ton	5.5166 Bales of Jute

**II. Standards of Area**

1 Hectare	2.47105 Acres , 1000 Square Meters
1 Acre	0.404686 Hectare, 4840 Sq. Yards 4046.9 Sq . Meters (43560 Sq. ft.)
1 Sq.Mile	640 Acres, 2.59 Sq.Kilometres
1 Sq.Kilometre	0.3861 Sq.Mile, 100 Hectares 247.105 Acres
1 Sq.yard	0.8361 Sq.Metre, 9 Sq.feet
1 Sq.Metre	1.1960 Sq. Yards, 10.764 Square Feet
1 Sq . Foot	0.0929 m <sup>2</sup>
1 Km <sup>2</sup>	100 Hectares ( ha)

**III. Standards of Length**

1 Kilometre	0.62137 Mile, 3280.8 Feet, 1000metars ,1093.6 yards
1 Metre	1.0936 Yards, 39.36996 Inches, 3.2808 Feet
1 Yard	0.9144 metre, 91.44 Centimeters, 36 Inches
1 Inch	25.4 Millimetres, 2.54 Centimeters, 0.0254 Meters
1 Foot	30.48 Centimeters , 0.3048m
1 Millimetre	0.0328 Inch
1 Mile	1.6093 Kilometers
1 Chain	100 links, 20.1168 Meters, 66 Feet
13 Steps	10 Meters ( Approx)
7 Steps	5 Meters ( Approx )

**IV. Standard of Volume**

1 Cubic Inch	16.387 Cubic Cms
1 Cubic Centimeter	0.061 Cubic Inch
1 Cubic Foot	0.028 Cubic Meter
1 Cubic Meter	35.315 Cubic Feet , 1.3080 Cubic yards
1 Gallon	4.54596 Litres, 8 Pints
1 Litre	0.21998 Gallon , 1.76 Pints
1 Pint	0.5683 Litre

**V. Units**

1 Crore	10 Millions
1 Million	10 Lakhs
1 Lakh	100000
1 Billion	1000 Million
